Title: HEALTH ACT OF 1998

LAW OF MONGOLIA
Ulaanbaatar, 7 May 1998

HEALTH ACT. 1998

CHAPTER ONE

GENERAL PROVISIONS

Article 1. The Purpose Of The Law

The purpose of this Law is to define the State policy and basic principles on health and to regulate the relations raised in connection with responsibilities of organizations, business entities and individuals in safeguarding the social health and the rights of the citizens and officials of this country to health protection and medical aid and service; to regulate legal framework of activities of health organizations and employees thereof.

Article 2. The Legislation On Health

2.1. The legislation on health shall consist of the Constitution of Mongolia, this Law and other legislative acts enacted in conformity with them.

2.2. If International Treaty, to which Mongolia is a Party, is inconsistent with this Law, then provisions of International Treaty Shall prevail.

Article 3. Definitions Of The Law

3.1. The following definitions used in this Law shall be understood in the belownominated meanings.
3.1.1. “Health” means a state of physical, mental and social wellbeing and not merely the absence of disease or infirmity.
3.1.2. “Health protection” means a comprehensive set of medical, social and economic
measures, aimed at maintaining the health of the population through organizing the provision of public health care and medical services to the population.

3.1.3. “Public health care and services” means activities of health organizations, independently or jointly with Government structures, public organizations, business entities aimed at surveying, monitoring, protecting and promoting health of the population, prevention of diseases, providing health education, organizing medical training and research, and studying and eliminating negative factors.

3.1.4. “Health promotion” means measures taken by individuals, independently or jointly with others, aimed at protecting their health and promoting health lifestyle.

3.1.5. “Medical care and services” means activities taken by doctors and other medical personnel, whether by themselves or in cooperation with others, aimed at detecting, diagnosing, treating, rehabilitating and preventing diseases and injuries, including obstetrical care.

3.1.6. “Health organization” means a legal entity whose main objective and mandate is provision of public health care and hospital care and services to the population.

3.1.7. “Social medical staff” means doctors, feldshers, assistants to doctors, nurses, pharmacists, dentists and other qualified personnel with high and intermediate education in medicine.

3.1.8. “Health personnel” means medical specialists and any other people employed at health organization.

3.1.9. “Primary health care” means actions and measures taken at primary referral-level health organizations aimed at providing essential and primary health care to the population.

3.1.10. “Emergency medical aid” means actions and measures taken by doctors, whether independently or jointly with other medical specialists, to diagnose, treat lethal diseases and infirmity, treatment of which may not be postponed; and reanimate and prevent the occurrence of such lethal conditions of patients.

3.1.11. “Immunization” means a set of measures in order to prevent from, stop the spread of and defeat the communicable (contagious) diseases by using the vaccines.

3.1.12. “Donor” means a person who voluntarily donates his or her body organs\tissues or blood in order to save and support lives or health of others, or dead body from which some body organs\tissues can be removed with purpose to transfer.

3.1.13. “International quarantine diseases” mean the diseases which are mentioned in the international medical and sanitary regulation.

3.1.14. “Containing foci outbreak” means measures aimed at treating the sources of natural foci diseases that communicate from domestic and wild animals during the period of activation or the outbreak of the source.

3.1.15. “Treatment” means a set of professional activities of a doctor aimed at disease diagnosing, treating, rehabilitating and preventing the occurrence of diseases.

3.1.16. “Nursing” means set of professional measures taken by the nurse in order to prevent from, treat diseases, and rehabilitation of the sick person.

3.1.17. “Dispensing of drugs” means preparation, packing and giving away of drugs in conformity with pharmaceutical science.

3.1.18 The expression “The medical tools, equipment and instrument “ means things which
have been created in order to replant, rehabilitate, treat and reanimate human body’s functions and defects.”

Article 4. State Policy and Principles on Health

4.1. The State shall implement the policy on population health as follows:
4.1.1. Health of the population shall receive special attention and support of the State;
4.1.2. Primary health care shall be accessible to all citizens without discrimination;
4.1.3. Health organisations shall be treated equally, regardless of the type and form of ownership;
4.1.14. Certain types of health care and services shall be provided to the citizens by the State free of charge, as provided under the Constitution of Mongolia.

4.2. The main principles of the State policy on health of the population are as follows;
4.2.1. Protection and promotion of health of the population shall be based on the principles of humanity, scientific knowledge and achievements, methods of contemporary and traditional medicine.
4.2.2. The social medical aid and service shall be perceived as the core strategy in the protection and promotion of health, and health organisations with different ownership forms that provide medical services shall have open independent status.
4.2.3. Health policy and measures shall be implemented by joint efforts of State, Administrative and local self-governance bodies, health and other organisations, business entities, communities, families and individuals.
