**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Grounds-based approaches to restricting access to abortion should be revised in favour of making abortion available on the request of the woman, girl or other pregnant person. The Abortion Care Guideline recommends against laws and other regulations that restrict abortion by grounds. The guideline recommends abortion be available on the request of the woman, girl or other pregnant person.

Until they are replaced with abortion on request, any existing grounds should be formulated and applied in a manner consistent with international human rights law. This requires that abortion is available when carrying a pregnancy to term would cause the woman, girl or other pregnant person substantial pain or suffering, including but not limited to situations where the pregnancy is not viable. Grounds-based approaches that require fetal impairments to be fatal for abortion to be lawful frustrate providers and leave women no choice but to continue with pregnancy. Being required to continue with a pregnancy that causes significant distress violates numerous human rights. Abortion Care Guideline § 2.2.2.

- Source document: WHO Abortion Care Guideline (page 64)

**Additional notes**

In M.L v. Poland, the European Court of Human Rights decided that “the ban on abortion in Poland in the case of foetal abnormality, when sought for reasons of health and well-being”, amounts to an interference with private life and violates the Article 8 of the European Convention of Human Rights, concerning the right to respect for private and family life.

- Act on Family Planning, Protection of the Human Foetus and Conditions for Termination of Pregnancy (page 3)

---

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Third-party authorization requirements are incompatible with international human rights law, which provides that States may not restrict women's access to health services on the ground that they do not have the authorization of husbands, partners, parents or health authorities, because they are unmarried, or because they are women. The Abortion Care Guideline recommends that abortion be available on the request of the woman, girl or other pregnant person without the authorization of any other individual, body or institution. Abortion Care Guideline § 3.3.2.

</table>

**Related documents:**
- Act on Family Planning, Protection of the Human Foetus and Conditions for Termination of Pregnancy

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

To establish an enabling environment, there is a need for abortion care to be integrated into the health system across all levels (including primary, secondary and tertiary) – and supported in the community – to allow for expansion of health worker roles, including self-management approaches. To ensure both access to abortion and achievement of Universal Health Coverage (UHC), abortion must be centred within primary health care (PHC), which itself is fully integrated within the health system, facilitating referral pathways for higher-level care when needed. Abortion Care Guideline § 1.4.1.

**Source document:** WHO Abortion Care Guideline (page 52)

### Judicial authorization for minors

<table>

Compulsory counselling

Related documents:
- Act on Family Planning, Protection of the Human Foetus and Conditions for Termination of Pregnancy

WHO Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

While counselling should be made available and accessible, it should always be voluntary for women to choose whether or not they want to receive it. The right to refuse counselling when offered must be respected. Where provided, counselling must be available to individuals in a way that respects privacy and confidentiality.

Counselling should be person-centred and may need to be tailored according to the needs of the individual; young people, survivors of sexual and gender-based violence or members of marginalized groups may have different information or counselling requirements.

The content of and approach to counselling will need to be adjusted depending on the reason for seeking abortion services. Therefore, it is important for the counsellor to be aware of and sensitive to the individual's situation and needs. Abortion Care Guideline § 3.2.2.

Source document: WHO Abortion Care Guideline (page 77)

Compulsory waiting period

Yes

Related documents:
- Act on Family Planning, Protection of the Human Foetus and Conditions for Termination of Pregnancy (page 3)

Waiting period

From the time of consultation
3 days

WHO Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Mandatory waiting periods delay access to abortion, sometimes to the extent that women’s access to abortion or choice of abortion method is restricted. The Abortion Care Guideline recommends against mandatory waiting periods for abortion. Abortion Care Guideline § 3.3.1.

**Related documents:**
- Act on Family Planning, Protection of the Human Foetus and Conditions for Termination of Pregnancy

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

In situations where abortion is restricted for sex selection purposes, terminating a pregnancy for this reason is likely to involve an unsafe procedure carrying high risks. Any policies or guidelines on the use of technology in obstetric and fetal medicine should take into account the need to ensure women's access to safe abortion and other services - efforts to manage or limit sex selection should also not hamper or limit access to safe abortion services. Preventing gender-biased sex selection: an interagency statement.

**Source document:** Preventing Gender-Biased Sex Selection (page 17)

| Restrictions on methods to detect sex of the foetus | No data found |

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Dissemination of misinformation, withholding of information and censorship should be prohibited.

Information should be accessible and understandable, including formats catering to low-literacy and differently abled populations. Different modalities exist for the provision of information on abortion, e.g. remote access via hotlines and telemedicine, and through approaches such as harm reduction and community-based outreach, as well as in-person interactions with health workers.

**Source document:** WHO Abortion Care Guideline (page 74)

| Other | No data found |

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

A woman is entitled to know the status of her pregnancy and to act on this information. Prenatal tests and other medical diagnostic services cannot legally be refused because the woman may decide to terminate her pregnancy.

**Source document:** WHO Abortion Care Guideline (page 103)

| National guidelines for induced abortion | No data found |

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

National standards and guidelines for abortion care should be evidence based and periodically updated and should provide the necessary guidance to achieve equal access to comprehensive abortion care. Leadership should also promote evidence-based SRH services according to these standards and guidelines.

**Source document:** WHO Abortion Care Guideline (page 50)
<table>

</table>

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Vacuum aspiration is recommended for surgical abortions at or under 14 weeks to be provided by traditional and complementary medicine professionals, nurses, midwives, associate/advanced associate clinicians, generalist medical practitioners and specialist medical practitioners.

The Abortion Care Guideline recommends against the practice of dilatation and sharp curettage (D&C), including for sharp curette checks (i.e. to “complete” the abortion) following vacuum aspiration. Abortion Care Guideline § 3.4.1.

**Source document:** WHO Abortion Care Guideline (page 101)

Dilation and evacuation (D&E) is recommended for surgical abortions at or over 14 weeks to be provided by generalist medical practitioners and specialist medical practitioners. Vacuum aspiration can be used during a D&E. Abortion Care Guideline § 3.4.1.

**Source document:** WHO Abortion Care Guideline (page 103)

The recommended method for medical abortion is mifepristone followed by misoprostol (regimen differs by gestational age). Abortion Care Guideline § 3.4.2.

**Source document:** WHO Abortion Care Guideline (page 106)

The Abortion Care Guideline recommends the use of misoprostol alone, with a regimen that differs by gestational age. Evidence demonstrates that the use of combination mifepristone plus misoprostol is more effective than misoprostol alone. Abortion Care Guideline § 3.4.2.

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Mifepristone and misoprostol should be listed in relevant national EMLs (NEMLs) or their equivalent and should be included in the relevant clinical care/service delivery guidelines.

Inclusion in the NEML is one important component of ensuring that quality medicines are available.

For induced abortion, Mifepristone (200 mg) and misoprostol (200 μg), are recommended in the WHO EML. The EML specifically mentions the following co-packaged formulation: 1 tablet mifepristone (200 mg) + 4 tablets misoprostol (200 μg).

Restrictions on prescribing authority for some categories of health workers may need to be modified or other mechanisms put in place to make the medicines available for these health workers within the regulatory framework of the health system. Abortion Care Guideline § 1.4.4.

<tr>
<td>The Abortion Care Guideline recommends the option of telemedicine as an alternative to in-person interactions with the health worker to deliver medical abortion services in whole or in part. Telemedicine services should include referrals (based on the woman’s location) for medicines (abortion and pain control medicines), any abortion care or post-abortion follow-up required (including for emergency care if needed), and for post-abortion contraceptive services. Abortion Care Guideline § 3.6.1.</td>

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Where user fees are charged for abortion, this should be based on careful consideration of ability to pay, and fee waivers should be available for those who are facing financial hardship and adolescent abortion seekers. As far as possible, abortion services and supplies should be mandated for coverage under insurance plans as inability to pay is not an acceptable reason to deny or delay abortion care. Furthermore, having transparent procedures in all health-care facilities can ensure that informal charges are not imposed by staff. Abortion Care Guideline § 1.4.2.

WHO Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Conscientious Objection

The Abortion Care Guideline recommends that access to and continuity of comprehensive abortion care be protected against barriers created by conscientious objection. It is critical that States ensure compliance with regulations and design/organize health systems to ensure access to and continuity of quality abortion care. If it proves impossible to regulate conscientious objection in a way that respects, protects and fulfills abortion seekers' rights, conscientious objection in abortion provision may become indefensible. Abortion Care Guideline § 3.3.9.

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Where it is lawful, abortion must be accessible in practice. This requires both ensuring that health-care facilities, commodities and services are accessible (including sufficient providers), and that law and policy on abortion is formulated, interpreted and applied in a way that is compatible with human rights. Abortion Care Guideline § 1.3.1.

### Indicators

Country specific information related to sexual and reproductive health indications. As data for the Sustainable Development Goal (SDG) indicators related to sexual and reproductive health become available, these will be provided, through periodic updates.

#### Goal 1. End poverty in all its forms everywhere

<table>
<thead>
<tr>
<th>Indicator</th>
<th>Data available</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1.1 Proportion of population below the international poverty line, by sex, age, employment status and geographical location (urban/rural)</td>
<td>No data</td>
</tr>
<tr>
<td>1.3.1 Proportion of population covered by social protection floors/systems, by sex, distinguishing children, unemployed persons, older persons, persons with disabilities, pregnant women, newborns, work-injury victims and the poor and the vulnerable</td>
<td>No data</td>
</tr>
<tr>
<td>1.a.2 Proportion of total government spending on essential services (education, health and social protection)</td>
<td>No data</td>
</tr>
</tbody>
</table>

#### Goal 3. Ensure healthy lives and promote well-being for all at all ages

<table>
<thead>
<tr>
<th>Indicator</th>
<th>Data available</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.1.1 Maternal mortality ratio</td>
<td>2 (2017)</td>
</tr>
<tr>
<td>3.1.2 Proportion of births attended by skilled health personnel</td>
<td>No data</td>
</tr>
<tr>
<td>3.7.1 Proportion of women of reproductive age (aged 15-49 years) who have their need for family planning satisfied with modern methods</td>
<td>No data</td>
</tr>
<tr>
<td>3.7.2 Adolescent birth rate (aged 10-14 years; aged 15-19 years) per 1,000 women in that age group</td>
<td>12.7 (2015-2020)</td>
</tr>
</tbody>
</table>
3.8.2 Number of people covered by health insurance or a public health system per 1,000 population

3.c.1 Health worker density and distribution

No data

Goal 4. Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

4.1.1 Proportion of children and young people: (a) in grades 2/3; (b) at the end of primary; and (c) at the end of lower secondary achieving at least a minimum proficiency level in (i) reading and (ii) mathematics, by sex

No data

Goal 5. Achieve gender equality and empower all women and girls

5.1.1 Whether or not legal frameworks are in place to promote, enforce and monitor equality and nondiscrimination on the basis of sex

No data

5.2.1 Proportion of ever-partnered women and girls aged 15 years and older subjected to physical, sexual or psychological violence by a current or former intimate partner in the previous 12 months, by form of violence and by age

No data

5.2.2 Proportion of women and girls aged 15 years and older subjected to sexual violence by persons other than an intimate partner in the previous 12 months, by age and place of occurrence

No data

5.3.1 Proportion of women aged 20-24 years who were married or in a union before age 15 and before age 18

No data

5.3.2 Proportion of girls and women aged 15-49 years who have undergone female genital mutilation/cutting, by age

No data

5.6.1 Proportion of women aged 15-49 years who make their own informed decisions regarding sexual relations, contraceptive use and reproductive health care

No data

5.6.2 Number of countries with laws and regulations that guarantee women aged 15-49 years access to sexual and reproductive health care, information and education

No data

5.a.1 (a) Proportion of total agricultural population with ownership or secure rights over agricultural land, by sex; and (b) share of women among owners or rights-bearers of agricultural land, by type of tenure

No data

5.b.1 Proportion of individuals who own a mobile telephone, by sex

No data

Goal 8. Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

8.5.2 Unemployment rate, by sex, age and persons with disabilities

No data

Goal 10. Reduce inequality within and among countries

10.2.1 Proportion of people living below 50 per cent of median income, by age, sex and persons with disabilities

No data

10.3.1 Proportion of the population reporting having personally felt discriminated against or harassed within the previous 12 months on the basis of a ground of discrimination prohibited under international human rights law

No data

Goal 16. Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels

16.1.3 Proportion of population subjected to physical, psychological or sexual violence in the previous 12 months

No data

16.2.2 Number of victims of human trafficking per 100,000 population, by sex, age and form of exploitation

No data

16.2.3 Proportion of young women and men aged 18-29 years who experienced sexual violence by age 18

No data

16.3.1 Proportion of victims of violence in the previous 12 months who reported their victimization to competent authorities or other officially recognized conflict resolution mechanisms

No data
16.5.1 Proportion of persons who had at least one contact with a public official and who paid a bribe to a public official, or were asked for a bribe by those public officials, during the previous 12 months

16.6.1 Primary government expenditures as a proportion of original approved budget, by sector (or by budget codes or similar)

16.6.2 Proportion of the population satisfied with their last experience of public services

16.7.1 Proportions of positions (by sex, age, persons with disabilities and population groups) in public institutions (national and local legislatures, public service, and judiciary) compared to national distributions

16.9.1 Proportion of children under 5 years of age whose births have been registered with a civil authority, by age

16.10.1 Number of verified cases of killing, kidnapping, enforced disappearance, arbitrary detention and torture of journalists, associated media personnel, trade unionists and human rights advocates in the previous 12 months

16.b.1 Proportion of population reporting having personally felt discriminated against or harassed in the previous 12 months on the basis of a ground of discrimination prohibited under international human rights law

Goal 17. Strengthen the means of implementation and revitalize the Global Partnership for Sustainable Development

17.8.1 Proportion of individuals using the Internet

Additional Reproductive Health Indicators

Percentage of married women with unmet need for family planning

Percentage of births attended by trained health professional

Percentage of women aged 20-24 who gave birth before age 18

Total fertility rate

Legal marital age for women, with parental consent

Legal marital age for women, without parental consent

Gender Inequalities Index (Value)

Gender Inequalities Index (Rank)

Mandatory paid maternity leave

Median age

Population, urban (%)

Percentage of secondary school completion rate for girls

Gender parity in secondary education

Percentage of women in non-agricultural employment
