### WHO Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

When there is no explicit reference to an issue covered in the questionnaire in the relevant document(s), this is noted and no interpretation was made.

Grounds-based approaches to restricting access to abortion should be revised in favour of making abortion available on the request of the woman, girl or other pregnant person. The Abortion Care Guideline recommends against laws and other regulations that restrict abortion by grounds. The guideline recommends abortion be available on the request of the woman, girl or other pregnant person.

Until they are replaced with abortion on request, any existing grounds should be formulated and applied in a manner consistent with international human rights law. This requires that abortion is available when carrying a pregnancy to term would cause the woman, girl or other pregnant person substantial pain or suffering, including but not limited to situations where the pregnancy is not viable. Grounds-based approaches that require fetal impairments to be fatal for abortion to be lawful frustrate providers and leave women no choice but to continue with pregnancy. Being required to continue with a pregnancy that causes significant distress violates numerous human rights. Abortion Care Guideline § 2.2.2.

Abortion is permitted in case of several social indications, which include where the age of the pregnant woman under 18 and over 40; pregnancy resulting from rape, incest or trafficking in human beings; divorce during pregnancy; death of the husband during pregnancy; deprivation of liberty or forfeiture of parental rights of one or both spouses; pregnant women in the process of migration; pregnant women with 5 or more children; pregnant women takes care of a child under 2 years old; or one or more family members with severe disability, who need care, according to the conclusion of the Vitality Medical Expertise Council; or association of at least 2 circumstances: homelessness, lack of financial sources of existence, alcohol and / or drug abuse, acts of domestic violence, vagrancy.

### Additional notes

The gestational limit in these circumstances is 21 weeks.

## Additional Requirements to Access Safe Abortion
### Authorization of health professional(s)

No

**Related documents:**
- Regulation on Voluntary Interruption of Pregnancy in Safe Conditions (page 6)
- Criminal Code (page 66)
- Standards for Interruption of Pregnancy in Safe Conditions, 2020 (page 6)

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Third-party authorization requirements are incompatible with international human rights law, which provides that States may not restrict women’s access to health services on the ground that they do not have the authorization of husbands, partners, parents or health authorities, because they are unmarried, or because they are women. The Abortion Care Guideline recommends that abortion be available on the request of the woman, girl or other pregnant person without the authorization of any other individual, body or institution. Abortion Care Guideline § 3.3.2.

*Source document: WHO Abortion Care Guideline (page 81)*

**Additional notes**

### Authorization in specially licensed facilities only

Yes

**Related documents:**
- Standards for Interruption of Pregnancy in Safe Conditions, 2020 (page 4)

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Abortions after 12 weeks of gestation need to be approved by a Medical Advisory Board of a public health care facility. The Board is composed of a specialist obstetrician gynecologist, the medical director of the public medical institution, the institution's lawyer and its obstetrics chief and a specialist in internal medicine.

*Source document: WHO Abortion Care Guideline (page 52)*

**Additional notes**

Voluntary termination of pregnancy is carried out in medical institutions accredited for the provision of this type of service, at the choice of the pregnant woman, regardless of place of residence or residence visa.

### Judicial authorization for minors

Not specified

When there is no explicit reference to an issue covered in the questionnaire in the relevant document(s), this is noted and no interpretation was made.

**Related documents:**
- Regulation on Voluntary Interruption of Pregnancy in Safe Conditions

*Source document: WHO Abortion Care Guideline (page 81)*

### Judicial authorization in cases of rape

Not specified

When there is no explicit reference to an issue covered in the questionnaire in the relevant document(s), this is noted and no interpretation was made.

**Related documents:**
- Regulation on Voluntary Interruption of Pregnancy in Safe Conditions
- Reproductive Health Law
- Standards for Interruption of Pregnancy in Safe Conditions, 2020

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

There shall be no procedural requirements to “prove” or “establish” satisfaction of grounds, such as requiring judicial orders or police reports in cases of rape or sexual assault (for sources to support this information). These restrictions subject the individual to unnecessary trauma, may put them at increased risk from the perpetrator, and may cause women to resort to unsafe abortion.

The Abortion Care Guideline recommends abortion be available on the request of the woman, girl or other pregnant person. Abortion Care Guideline § 2.2.2.

*Source document: WHO Abortion Care Guideline (page 64)*
Police report required in case of rape

Related documents:
- Regulation on Voluntary Interruption of Pregnancy in Safe Conditions
- Reproductive Health Law

Parental consent required for minors

Yes

Related documents:
- Regulation on Voluntary Interruption of Pregnancy in Safe Conditions (page 4)
- Reproductive Health Law (page 4)
- Law on Patient Rights and Responsibilities (page 6)
- Standards for Interruption of Pregnancy in Safe Conditions, 2020 (page 5)

Can another adult consent in place of a parent?

Yes

Pregnant women under the age of 16 require the consent of their legal representative unless the pregnancy endangers the life of the pregnant woman. If it is impossible to obtain the consent of the representative and when medical services are required to preserve a minor's life and her health, her voluntary consent is sufficient. In this situation, the decision is taken by the advisory service providers in the best interest of the minor, in accordance with the regulations of the Ministry of Health.

Age where consent not needed

16

If it is impossible to obtain the consent of the minor's legal representative and the medical services are indicated to preserve his or her life and health, his or her voluntary consent is sufficient. In this situation, the decision is taken in a consultative manner by the service providers, in the best interest of the minor. In case of an emergency medical situation, when the termination of pregnancy is necessary to save the life of the pregnant woman, when she cannot express her will and the consent of her legal representative cannot be obtained, the medical staff, authorized in the manner established by legislation, has the right to make the decision to terminate the pregnancy in the interest of the woman.

Who Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

While parental or partner involvement in abortion decision-making can support and assist women, girls or other pregnant persons, this must be based on the values and preferences of the person availing of abortion and not imposed by third-party authorization requirements. Third-party authorization requirements are incompatible with international human rights law, which provides that States may not restrict women's access to health services on the ground that they do not have the authorization of husbands, partners, parents or health authorities, because they are unmarried, or because they are women. The Abortion Care Guideline recommends that abortion be available on the request of the woman, girl or other pregnant person without the authorization of any other individual, body or institution. Abortion Care Guideline § 3.3.2.

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Vacuum aspiration is recommended for surgical abortions at or under 14 weeks to be provided by traditional and complementary medicine professionals, nurses, midwives, associate/advanced associate clinicians, generalist medical practitioners and specialist medical practitioners.

The Abortion Care Guideline recommends against the practice of dilatation and sharp curettage (D&C), including for sharp curette checks (i.e. to “complete” the abortion) following vacuum aspiration. Abortion Care Guideline § 3.4.1.

*Source document:* WHO Abortion Care Guideline (page 101)

Dilation and evacuation (D&E) is recommended for surgical abortions at or over 14 weeks to be provided by generalist medical practitioners and specialist medical practitioners. Vacuum aspiration can be used during a D&E. Abortion Care Guideline § 3.4.1.

*Source document:* WHO Abortion Care Guideline (page 103)

The recommended method for medical abortion is mifepristone followed by misoprostol (regimen differs by gestational age). Abortion Care Guideline § 3.4.2.

*Source document:* WHO Abortion Care Guideline (page 106)

The Abortion Care Guideline recommends the use of misoprostol alone, with a regime that differs by gestational age. Evidence demonstrates that the use of combination mifepristone plus misoprostol is more effective than misoprostol alone. Abortion Care Guideline § 3.4.2.

*Source document:* WHO Abortion Care Guideline (page 106)
Mifepristone and misoprostol should be listed in relevant national EMLs (NEMLs) or their equivalent and should be included in the relevant clinical care/service delivery guidelines.

Inclusion in the NEML is one important component of ensuring that quality medicines are available.

For induced abortion, mifepristone (200 mg) and misoprostol (200 μg), are recommended in the WHO EML. The EML specifically mentions the following co-packaged formulation: 1 tablet mifepristone (200 mg) + 4 tablets misoprostol (200 μg).

Restrictions on prescribing authority for some categories of health workers may need to be modified or other mechanisms put in place to make the medicines available for these health workers within the regulatory framework of the health system. Abortion Care Guideline § 1.4.4.

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

The Abortion Care Guideline recommends the option of telemedicine as an alternative to in-person interactions with the health worker to deliver medical abortion services in whole or in part. Telemedicine services should include referrals (based on the woman’s location) for medicines (abortion and pain control medicines), any abortion care or post-abortion follow-up required (including for emergency care if needed), and for post-abortion contraceptive services. Abortion Care Guideline § 3.6.1.

**Contraception included in post-abortion care**

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

All contraceptive options may be considered after an abortion. For individuals undergoing surgical abortion and wishing to use contraception, Abortion Care Guideline recommends the option of initiating the contraception at the time of surgical abortion. For individuals undergoing medical abortion, for those who choose to use hormonal contraception, the Abortion Care Guideline suggests that they be given the option of starting hormonal contraception immediately after the first pill of the medical abortion regimen. For those who choose to have an IUD inserted, Abortion Care Guideline suggests IUD placement at the time that success of the abortion procedure is determined. Abortion Care Guideline § 3.5.4.

### WHO Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Where user fees are charged for abortion, this should be based on careful consideration of ability to pay, and fee waivers should be available for those who are facing financial hardship and adolescent abortion seekers. As far as possible, abortion services and supplies should be mandated for coverage under insurance plans as inability to pay is not an acceptable reason to deny or delay abortion care. Furthermore, having transparent procedures in all health-care facilities can ensure that informal charges are not imposed by staff. Abortion Care Guideline § 1.4.2.

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

There is no single recommended approach to providing abortion services. The choice of specific health worker(s) (from among the recommended options) or management by the individual themself, and the location of service provision (from among recommended options) will depend on the values and preferences of the woman, girl or other pregnant person, available resources, and the national and local context. A plurality of service-delivery approaches can co-exist within any given context. Given that service-delivery approaches can be diverse, it is important to ensure that for the individual seeking care, the range of service-delivery options taken together will provide access to scientifically accurate, understandable information at all stages; access to quality-assured medicines (including those for pain management); back-up referral support if desired or needed; linkages to an appropriate choice of contraceptive services for those who want post-abortion contraception. Best Practice Statement 49 on service delivery. Abortion Care Guideline § 3.6.1.

**Conscientious Objection**

**Public sector providers**

No data found

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

The Abortion Care Guideline recommends that access to and continuity of comprehensive abortion care be protected against barriers created by conscientious objection. It is critical that States ensure compliance with regulations and design/organize health systems to ensure access to and continuity of quality abortion care. If it proves impossible to regulate conscientious objection in a way that respects, protects and fulfills abortion seekers’ rights, conscientious objection in abortion provision may become indefensible. Abortion Care Guideline § 3.3.9.

**Private sector providers**

Indicators
Country specific information related to sexual and reproductive health indications. As data for the Sustainable Development Goal (SDG) indicators related to sexual and reproductive health become available, these will be provided through periodic updates.

Goal 1. End poverty in all its forms everywhere

1.1.1 Proportion of population below the international poverty line, by sex, age, employment status and geographical location (urban/rural)  
No data

1.3.1 Proportion of population covered by social protection floors/systems, by sex, distinguishing children, unemployed persons, older persons, persons with disabilities, pregnant women, newborns, work-injury victims and the poor and the vulnerable  
No data

1.a.2 Proportion of total government spending on essential services (education, health and social protection)  
No data

Goal 3. Ensure healthy lives and promote well-being for all at all ages

3.1.1 Maternal mortality ratio  
19 (2017)

3.1.2 Proportion of births attended by skilled health personnel

Public facilities

Neither Type of Provider Permitted

No data found

Private facilities

Neither Type of Provider Permitted

No data found

Neither Type of Facility Permitted

Source document: WHO Abortion Care Guideline (page 48)
3.7.1 Proportion of women of reproductive age (aged 15-49 years) who have their need for family planning satisfied with modern methods

No data

3.7.2 Adolescent birth rate (aged 10-14 years; aged 15-19 years) per 1,000 women in that age group

22 (2015-2020)

3.8.2 Number of people covered by health insurance or a public health system per 1,000 population

No data

3.c.1 Health worker density and distribution

No data

Goal 4. Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

4.1.1 Proportion of children and young people: (a) in grades 2/3; (b) at the end of primary; and (c) at the end of lower secondary achieving at least a minimum proficiency level in (i) reading and (ii) mathematics, by sex

No data

Goal 5. Achieve gender equality and empower all women and girls

5.1.1 Whether or not legal frameworks are in place to promote, enforce and monitor equality and nondiscrimination on the basis of sex

No data

5.2.1 Proportion of ever-partnered women and girls aged 15 years and older subjected to physical, sexual or psychological violence by a current or former intimate partner in the previous 12 months, by form of violence and by age

No data

5.2.2 Proportion of women and girls aged 15 years and older subjected to sexual violence by persons other than an intimate partner in the previous 12 months, by age and place of occurrence

No data

5.3.1 Proportion of women aged 20-24 years who were married or in a union before age 15 and before age 18

No data

5.3.2 Proportion of girls and women aged 15-49 years who have undergone female genital mutilation/cutting, by age

No data

5.6.1 Proportion of women aged 15-49 years who make their own informed decisions regarding sexual relations, contraceptive use and reproductive health care

No data

5.6.2 Number of countries with laws and regulations that guarantee women aged 15-49 years access to sexual and reproductive health care, information and education

No data

5.a.1 (a) Proportion of total agricultural population with ownership or secure rights over agricultural land, by sex; and (b) share of women among owners or rights-bearers of agricultural land, by type of tenure

No data

5.b.1 Proportion of individuals who own a mobile telephone, by sex

No data

Goal 8. Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

8.5.2 Unemployment rate, by sex, age and persons with disabilities

No data

Goal 10. Reduce inequality within and among countries

10.2.1 Proportion of people living below 50 per cent of median income, by age, sex and persons with disabilities

No data

10.3.1 Proportion of the population reporting having personally felt discriminated against or harassed within the previous 12 months on the basis of a ground of discrimination prohibited under international human rights law

No data

Goal 16. Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels

16.1.3 Proportion of population subjected to physical, psychological or sexual violence in the previous 12 months

No data

16.2.2 Number of victims of human trafficking per 100,000 population, by sex, age and form of exploitation

No data
16.2.3 Proportion of young women and men aged 18-29 years who experienced sexual violence by age 18

16.3.1 Proportion of victims of violence in the previous 12 months who reported their victimization to competent authorities or other officially recognized conflict resolution mechanisms

16.5.1 Proportion of persons who had at least one contact with a public official and who paid a bribe to a public official, or were asked for a bribe by those public officials, during the previous 12 months

16.6.1 Primary government expenditures as a proportion of original approved budget, by sector (or by budget codes or similar)

16.6.2 Proportion of the population satisfied with their last experience of public services

16.7.1 Proportions of positions (by sex, age, persons with disabilities and population groups) in public institutions (national and local legislatures, public service, and judiciary) compared to national distributions

16.9.1 Proportion of children under 5 years of age whose births have been registered with a civil authority, by age

16.10.1 Number of verified cases of killing, kidnapping, enforced disappearance, arbitrary detention and torture of journalists, associated media personnel, trade unionists and human rights advocates in the previous 12 months

16.b.1 Proportion of population reporting having personally felt discriminated against or harassed in the previous 12 months on the basis of a ground of discrimination prohibited under international human rights law

Goal 17. Strengthen the means of implementation and revitalize the Global Partnership for Sustainable Development

17.8.1 Proportion of individuals using the Internet

Additional Reproductive Health Indicators

- Percentage of married women with unmet need for family planning
- Percentage of births attended by trained health professional: 99.7 (2014)
- Percentage of women aged 20-24 who gave birth before age 18: 4 (2009-2013)
- Total fertility rate: 1.262 (2018)
- Legal marital age for women, with parental consent: 16 (2009-2017)
- Gender Inequalities Index (Value): 0.23 (2017)
- Gender Inequalities Index (Rank): 48 (2017)
- Mandatory paid maternity leave: yes (2020)
- Median age: 37.6 (2020)
- Population, urban (%): 42.557 (2018)
