**Persons who can be sanctioned:**
- A woman or girl can be sanctioned
- Providers can be sanctioned
- A person who assists can be sanctioned

**Abortion at the woman's request**

- Gestational limit: 14

**Legal Ground and Gestational Limit**
### Economic or social reasons

**Yes**

**Related documents:**
- Law on Sexual and Reproductive Health and Abortion, 2010 (page 9)
- Amendment to the Law on Sexual and Reproductive Health and Abortion, 2023 (page 10)

### Gestational limit

**Weeks:** 22

**Related documents:** Law on Sexual and Reproductive Health and Abortion, 2010 (page 9)

#### WHO Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Health grounds shall reflect WHO’s definitions of health, which entails a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity. Abortion Care Guideline § 2.2.2.

**Source document:** WHO Abortion Care Guideline (page 16)

Laws or policies that impose time limits on the length of pregnancy may have negative consequences for women, including forcing them to seek clandestine abortions and suffer social inequities. Safe Abortion Guidelines, § 4.2.1.7.

**Source document:** WHO Abortion Care Guideline (page 103)

#### Additional notes

Health is defined as "the state of complete physical, mental and social well-being and not only the absence of conditions or diseases."

### Foetal impairment

**Yes**

**Related documents:** Law on Sexual and Reproductive Health and Abortion, 2010 (page 9)

### Gestational limit

**Weeks:** 22 or No limit (depending on circumstance)

**Related documents:** Law on Sexual and Reproductive Health and Abortion, 2010 (page 9)

#### WHO Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Grounds-based approaches to restricting access to abortion should be revised in favour of making abortion available on the request of the woman, girl or other pregnant person. The Abortion Care Guideline recommends against laws and other regulations that restrict abortion by grounds. The guideline recommends abortion be available on the request of the woman, girl or other pregnant person.

Until they are replaced with abortion on request, any existing grounds should be formulated and applied in a manner consistent with international human rights law. This requires that abortion is available when carrying a pregnancy to term would cause the woman, girl or other pregnant person substantial pain or suffering, including but not limited to situations where the pregnancy is not viable. Grounds-based approaches that require fetal impairments to be fatal for abortion to be lawful frustrate providers and leave women no choice but to continue with pregnancy.

Being required to continue with a pregnancy that causes significant distress violates numerous human rights. Abortion Care Guideline § 2.2.2.

**Source document:** WHO Abortion Care Guideline (page 64)

Laws or policies that impose time limits on the length of pregnancy may have negative consequences for women, including forcing them to seek clandestine abortions and suffer social inequities. Safe Abortion Guidelines, § 4.2.1.7.

**Source document:** WHO Abortion Care Guideline (page 103)

### Rape

**No**

**Related documents:** Penal Code, 1995 (page 43)

#### WHO Guidance

Additional Requirements to Access Safe Abortion

**Authorization of health professional(s)**

**Yes**

**Related documents:**
- Law on Sexual and Reproductive Health and Abortion, 2010 (page 9)
- Amendment to the Law on Sexual and Reproductive Health and Abortion, 2023 (page 22)

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Third-party authorization requirements are incompatible with international human rights law, which provides that States may not restrict women’s access to health services on the ground that they do not have the authorization of husbands, partners, parents or health authorities, because they are unmarried, or because they are women. The Abortion Care Guideline recommends that abortion be available on the request of the woman, girl or other pregnant person without the authorization of any other individual, body or institution. Abortion Care Guideline § 3.3.2.

**Additional notes**

An authorization by one doctor or specialist is required in case of serious risk to the life or health of the woman – except in case of emergency. Two specialists must issue an opinion in case of risk of serious anomalies in the fetus. Where fetal anomalies are found to be incompatible with life and are recorded in an opinion previously issued by a doctor or specialist or when an extremely serious and incurable disease is detected in the fetus, confirmation by a multidisciplinary Clinical Committee is required. The authorizing doctors or specialists must be different from the person undertaking the abortion procedure.

WHO Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

While parental or partner involvement in abortion decision-making can support and assist women, girls or other pregnant persons, this must be based on the values and preferences of the person availing of abortion and not imposed by third-party authorization requirements. Third-party authorization requirements are incompatible with international human rights law, which provides that States may not restrict women’s access to health services on the ground that they do not have the authorization of husbands, partners, parents or health authorities, because they are unmarried, or because they are women. The Abortion Care Guideline recommends that abortion be available on the request of the woman, girl or other pregnant person without the authorization of any other individual, body or institution. Abortion Care Guideline § 3.3.2.

Source document: WHO Abortion Care Guideline (page 81)

Additional notes

Women may voluntarily terminate their pregnancy from age 16, without the consent of their legal representatives. In the case of minors under 16 years of age, the consent of the legal representative is required. In the case of pregnant minors under 16 years of age in a situation of helplessness whose guardianship has not yet been assumed by the Public Entity to which, in the respective territory, the protection of minors is entrusted and consent by proxy is required for termination of pregnancy, the provisions of article 172.4 of the Civil Code shall apply, and the Public Entity that assumes provisional custody may give consent by proxy for the voluntary interruption of pregnancy, in order to safeguard the right of the minor to it. In case of discrepancy between the minor and those called to give consent by representation, the conflicts will be resolved in accordance with the provisions of civil legislation by the judicial authority, and a judicial defender must be appointed to the minor within the procedure and with the intervention of the Public Prosecutor.

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

While counselling should be made available and accessible, it should always be voluntary for women to choose whether or not they want to receive it. The right to refuse counselling when offered must be respected. Where provided, counselling must be available to individuals in a way that respects privacy and confidentiality.

Counselling should be person-centred and may need to be tailored according to the needs of the individual; young people, survivors of sexual and gender-based violence or members of marginalized groups may have different information or counselling requirements.

The content of and approach to counselling will need to be adjusted depending on the reason for seeking abortion services. Therefore, it is important for the counsellor to be aware of and sensitive to the individual's situation and needs. Abortion Care Guideline § 3.2.2.

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

In situations where abortion is restricted for sex selection purposes, terminating a pregnancy for this reason is likely to involve an unsafe procedure carrying high risks. Any policies or guidelines on the use of technology in obstetric and fetal medicine should take into account the need to ensure women's access to safe abortion and other services - efforts to manage or limit sex selection should also not hamper or limit access to safe abortion services. Preventing gender-biased sex selection: an interagency statement.

</tr>
</tbody>
</table>

### WHO Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

 Vacuum aspiration is recommended for surgical abortions at or under 14 weeks to be provided by traditional and complementary medicine professionals, nurses, midwives, associate/advanced associate clinicians, generalist medical practitioners and specialist medical practitioners.

The Abortion Care Guideline recommends against the practice of dilatation and sharp curettage (D&C), including for sharp curette checks (i.e. to "complete" the abortion) following vacuum aspiration. Abortion Care Guideline § 3.4.1.

Dilation and evacuation (D&E) is recommended for surgical abortions at or over 14 weeks to be provided by generalist medical practitioners and specialist medical practitioners. Vacuum aspiration can be used during a D&E. Abortion Care Guideline § 3.4.1.

The recommended method for medical abortion is mifepristone followed by misoprostol (regimen differs by gestational age). Abortion Care Guideline § 3.4.2.

### Country recognized approval (mifepristone / misoprostol)

Yes

### Pharmacy selling or distribution

No

Mifepristone should be dispensed in the medical office to facilitate its administration and follow-up of its therapeutic regimen. A prescription is required.

### WHO Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Mifepristone and misoprostol should be listed in relevant national EMLs (NEMLs) or their equivalent and should be included in the relevant clinical care/service delivery guidelines.

Inclusion in the NEML is one important component of ensuring that quality medicines are available.

For induced abortion, Mifepristone (200 mg) and misoprostol (200 μg), are recommended in the WHO EML. The EML specifically mentions the following co-packaged formulation: 1 tablet mifepristone (200 mg) + 4 tablets misoprostol (200 μg).

Restrictions on prescribing authority for some categories of health workers may need to be modified or other mechanisms put in place to make the medicines available for these health workers within the regulatory framework of the health system. Abortion Care Guideline § 1.4.4.
### Country recognized approval (misoprostol)

**Related documents:**
- Law on Use of Medicines and Health Products, 2006 (page 1)
- Medicines List, 2012 (page 1)
- Misoprostol Registration (page 1)

**Misoprostol allowed to be sold or distributed by pharmacies or drug stores**

No

Must be dispensed by a pharmacy within a hospital. It is not specified whether a prescription is required.

- Misoprostol Registration (page 1)

### WHO Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Mifepristone and misoprostol should be listed in relevant national EMLs (NEMLs) or their equivalent and should be included in the relevant clinical care/service delivery guidelines.

Inclusion in the NEML is one important component of ensuring that quality medicines are available.

For induced abortion, Mifepristone (200 mg) and misoprostol (200 \( \mu g \)) are recommended in the WHO EML. The EML specifically mentions the following co-packaged formulation: 1 tablet mifepristone (200 mg) + 4 tablets misoprostol (200 \( \mu g \)).

Restrictions on prescribing authority for some categories of health workers may need to be modified or other mechanisms put in place to make the medicines available for these health workers within the regulatory framework of the health system. Abortion Care Guideline § 1.4.4.

**Other (if applicable)**

Abortion is to be provided in public hospitals that fulfill the legal requirements established in the Annex of the Quality of Care Guidelines or in private hospitals that, fulfilling the same requirements, obtain an authorization from a local authority. The Common Guide for the National Health System on Medical Abortion suggests that “immediate attention must be provided in the same center where the intervention is performed, and the subsequent accompaniment must be coordinated with the specialized center where the process started.”

*Source document: Common Guide for the National Health System on Medical Abortion, 2022 (page 30)*

#### WHO Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

The Abortion Care Guideline recommends the option of telemedicine as an alternative to in-person interactions with the health worker to deliver medical abortion services in whole or in part. Telemedicine services should include referrals (based on the woman's location) for medicines (abortion and pain control medicines), any abortion care or post-abortion follow-up required (including for emergency care if needed), and for post-abortion contraceptive services. Abortion Care Guideline § 3.6.1.

*Source document: WHO Abortion Care Guideline (page 133)*

### Contraception included in post-abortion care

Yes

**Related documents:**
- Common Guide for the National Health System on Medical Abortion, 2022 (page 29)

#### WHO Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

All contraceptive options may be considered after an abortion. For individuals undergoing surgical abortion and wishing to use contraception, Abortion Care Guideline recommends the option of initiating the contraception at the time of surgical abortion. For individuals undergoing medical abortion, for those who choose to use hormonal contraception, the Abortion Care Guideline suggests that they be given the option of starting hormonal contraception immediately after the first pill of the medical abortion regimen. For those who choose to have an IUD inserted, Abortion Care Guideline suggests IUD placement at the time that success of the abortion procedure is determined. Abortion Care Guideline § 3.5.4.

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Where user fees are charged for abortion, this should be based on careful consideration of ability to pay, and fee waivers should be available for those who are facing financial hardship and adolescent abortion seekers. As far as possible, abortion services and supplies should be mandated for coverage under insurance plans as inability to pay is not an acceptable reason to deny or delay abortion care. Furthermore, having transparent procedures in all health-care facilities can ensure that informal charges are not imposed by staff. Abortion Care Guideline § 1.4.2.

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

The Abortion Care Guideline recommends against regulation on who can provide and manage abortion that is inconsistent with WHO guidance. Abortion Care Guideline § 3.3.8.

Source document: WHO Abortion Care Guideline (page 97)
**Conscientious Objection**

### Public sector providers

**Referral linkages to a higher-level facility**

- Not specified

**Availability of a specialist doctor, including OB/GYN**

- Yes

**Minimum number of beds**

- Not specified

**Other (if applicable)**

- Facilities are required to have: - a reception area and waiting room - a room to provide information to pregnant women - space for physical and ultrasound examination - Zone for surgical cleaning - a room suitable for voluntary abortion - a rest and recovery room - equipment necessary to perform gynecological examinations material - equipment to perform abortion - ultrasound - heart monitoring equipment - ventilator/ventilation system - defibrillator and cardiopulmonary resuscitation equipment - systems that enable the administration of oxygen - electrical system maintenance. For high-risk pregnancy abortions or abortions after 14 weeks, the following requirements also apply: - equipment to perform abortion under whichever method of anesthesia ([“bajo cualquier modalidad de anestesia”] - electrocardiograph - intubation equipment - obstetric and gynecology unit - blood bank or depository. Nurse and hospital units concerned.

### WHO Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

There is no single recommended approach to providing abortion services. The choice of specific health worker(s) (from among the recommended options) or management by the individual themselves, and the location of service provision (from among recommended options) will depend on the values and preferences of the woman, girl or other pregnant person, available resources, and the national and local context. A plurality of service-delivery approaches can co-exist within any given context. Given that service-delivery approaches can be diverse, it is important to ensure that for the individual seeking care, the range of service-delivery options taken together will provide access to scientifically accurate, understandable information at all stages; access to quality-assured medicines (including those for pain management); back-up referral support if desired or needed; linkages to an appropriate choice of contraceptive services for those who want post-abortion contraception. Best Practice Statement 49 on service delivery. Abortion Care Guideline § 3.6.1.

- Amendment to the Law on Sexual and Reproductive Health and Abortion, 2023 (page 25)

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Health professionals directly involved in the voluntary interruption of pregnancy will have the right to exercise conscientious objection without the access and quality of care of the provision being undermined by the exercise of conscientious objection. Rejection or refusal to carry out the intervention of interruption of pregnancy for reasons of conscience is always an individual decision of the health personnel directly involved in carrying out the voluntary interruption of pregnancy, which must be stated in advance and in writing. In any case, health professionals will provide appropriate treatment and medical attention to women who need it before and after having undergone a pregnancy termination intervention.

- Amendment to the Law on Sexual and Reproductive Health and Abortion, 2023 (page 25)

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

The Abortion Care Guideline recommends that access to and continuity of comprehensive abortion care be protected against barriers created by conscientious objection. It is critical that States ensure compliance with regulations and design/organize health systems to ensure access to and continuity of quality abortion care. If it proves impossible to regulate conscientious objection in a way that respects, protects and fulfills abortion seekers' rights, conscientious objection in abortion provision may become indefensible. Abortion Care Guideline § 3.3.9.

WHO Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Where it is lawful, abortion must be accessible in practice. This requires both ensuring that health-care facilities, commodities and services are accessible (including sufficient providers), and that law and policy on abortion is formulated, interpreted and applied in a way that is compatible with human rights. Abortion Care Guideline § 1.3.1.

Additional notes

No

Refusal to perform the intervention for termination of pregnancy for reasons of conscience is always an individual decision of the healthcare personnel.

Private facilities

No

4.1.1 Proportion of children and young people: (a) in grades 2/3; (b) at the end of primary; and (c) at the end of lower secondary achieving at least a minimum proficiency level in (i) reading and (ii) mathematics, by sex

No data

Goal 5. Achieve gender equality and empower all women and girls

5.1.1 Whether or not legal frameworks are in place to promote, enforce and monitor equality and nondiscrimination on the basis of sex

No data

5.2.1 Proportion of ever-partnered women and girls aged 15 years and older subjected to physical, sexual or psychological violence by a current or former intimate partner in the previous 12 months, by form of violence and by age

No data

5.2.2 Proportion of women and girls aged 15 years and older subjected to sexual violence by persons other than an intimate partner in the previous 12 months, by age and place of occurrence

No data

5.3.1 Proportion of women aged 20-24 years who were married or in a union before age 15 and before age 18

No data

5.3.2 Proportion of girls and women aged 15-49 years who have undergone female genital mutilation/cutting, by age

No data

5.6.1 Proportion of women aged 15-49 years who make their own informed decisions regarding sexual relations, contraceptive use and reproductive health care

No data

5.6.2 Number of countries with laws and regulations that guarantee women aged 15-49 years access to sexual and reproductive health care, information and education

No data

5.a.1 (a) Proportion of total agricultural population with ownership or secure rights over agricultural land, by sex; and (b) share of women among owners or rights-bearers of agricultural land, by type of tenure

No data

5.b.1 Proportion of individuals who own a mobile telephone, by sex

No data

Goal 8. Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

8.5.2 Unemployment rate, by sex, age and persons with disabilities

No data

Goal 10. Reduce inequality within and among countries

10.2.1 Proportion of people living below 50 per cent of median income, by age, sex and persons with disabilities

No data

10.3.1 Proportion of the population reporting having personally felt discriminated against or harassed within the previous 12 months on the basis of a ground of discrimination prohibited under international human rights law

No data

Goal 16. Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels

16.1.3 Proportion of population subjected to physical, psychological or sexual violence in the previous 12 months

No data

16.2.2 Number of victims of human trafficking per 100,000 population, by sex, age and form of exploitation

No data

16.2.3 Proportion of young women and men aged 18-29 years who experienced sexual violence by age 18

No data

16.3.1 Proportion of victims of violence in the previous 12 months who reported their victimization to competent authorities or other officially recognized conflict resolution mechanisms

No data

16.5.1 Proportion of persons who had at least one contact with a public official and who paid a bribe to a public official, or were asked for a bribe by those public officials, during the previous 12 months

No data

16.6.1 Primary government expenditures as a proportion of original approved budget, by sector (or by budget codes or similar)

No data

16.6.2 Proportion of the population satisfied with their last experience of public services

No data
### 16.7.1 Proportions of positions (by sex, age, persons with disabilities and population groups) in public institutions (national and local legislatures, public service, and judiciary) compared to national distributions
