Country Profile: Sweden

Region: Northern Europe

Last Updated: 7 May 2017

Identified policies and legal sources related to abortion:

- Reproductive Health Act
- General Medical Health Act
- Constitution
- Criminal / Penal Code
- Civil Code
- Ministerial Order / Decree
- Case Law
- Health Regulation / Clinical Guidelines
- EML / Registered List
- Medical Ethics Code
- Document Relating to Funding
- Abortion Specific Law
- Law on Medical Practitioners
- Law on Health Care Services
- Other

Related Documents

From General Medical Health Act:
- Health Care Act, 1982

From EML / Registered List:
- Mifepristone/Misoprostol Combination Approval
- Misoprostol Approval

Concluding Observations:

- CEDAW
- CRC
- CRC

Persons who can be sanctioned:

- A woman or girl can be sanctioned
- Providers can be sanctioned
- A person who assists can be sanctioned

Abortion at the woman’s request

- Gestational limit: 18

Legal Ground and Gestational Limit

WHO Guidance
The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

A woman is entitled to know the status of her pregnancy and to act on this information; health protection or social reasons can be interpreted to include distress of the pregnant woman caused by the diagnosis of fetal impairment. Prenatal tests and other medical diagnostic services cannot legally be refused because the woman may decide to terminate her pregnancy. Safe Abortion Guidelines, § 4.2.1.4.

**Gestational limit**

**Weeks: viability**

**Related documents:** *Law on Abortion, 1975 (page 2)*

**WHO Guidance**

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

The fulfillment of human rights requires that women can access safe abortion when it is indicated to protect their health. WHO defines health for member states as a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity. Safe Abortion Guidelines, § 4.2.1.2.

**Source document:** WHO Safe Abortion Guidance (page 102)

Laws or policies that impose time limits on the length of pregnancy may have negative consequences for women, including forcing them to seek clandestine abortions and suffer social inequities. Safe Abortion Guidelines, § 4.2.1.7.

Additional Requirements to Access Safe Abortion

**Authorization of health professional(s)**
- Yes

**Related documents:**
- Law on Abortion, 1975 (page 2)

**Number and cadre of health-care professional authorizations required**

*National Board of Health and Welfare*

An abortion may not be procured after the expiry of the eighteenth week of pregnancy without permission for the action being granted to the woman by the National Board of Health and Welfare. Such permission may only be granted if there are special reasons for the abortion. Permission as aforesaid may not be granted if there is reason to suppose that the embryo is viable.

- Law on Abortion, 1975 (page 2)
- Amendment to Abortion Law, 2009 (page 1)
- https://abortion-policies.srhr.org/documents/countries/

**WHO Guidance**

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

Third-party authorization should not be required for women to obtain abortion services. The requirement for authorization by hospital authorities may violate the right to privacy and women’s access to health care on the basis of equality of men and women. Safe Abortion Guidelines, § 4.2.2.2.

**Additional notes**

An abortion may not be procured after the expiry of the eighteenth week of pregnancy without permission for the action being granted to the woman by the National Board of Health and Welfare. Such permission may only be granted if there are special reasons for the abortion. Permission as aforesaid may not be granted if there is reason to suppose that the embryo is viable.

**Prohibition of sex-selective abortion**

In situations where abortion is restricted for sex selection purposes, terminating a pregnancy for this reason is likely to involve an unsafe procedure carrying high risks. Any policies or guidelines on the use of technology in obstetric and fetal medicine should take into account the need to ensure women’s access to safe abortion and other services - efforts to manage or limit sex selection should also not hamper or limit access to safe abortion services. Preventing gender-biased sex selection: an interagency statement, p 10 - Recommendation.

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

Vacuum aspiration is the recommended technique of surgical abortion for pregnancies of up to 12 to 14 weeks of gestation. The procedure should not be routinely completed by dilatation and sharp curettage (D&C). Safe Abortion Guidelines, Executive Summary, Box 1-Recommendation.

**Source document:** WHO Safe Abortion Guidance (page 123)

Dilatation and evacuation (D&E) and medical methods (mifepristone and misoprostol; misoprostol alone) are both recommended methods for abortion for gestations over 12 to 14 weeks. Safe Abortion Guidelines, Executive Summary, Box 3-Recommendation.

**Source document:** WHO Safe Abortion Guidance (page 123)

The recommended method for medical abortion is mifepristone followed by misoprostol (regimen differs by gestational age). Safe Abortion Guidelines, Executive Summary, Box 2-Recommendation.

**Source document:** WHO Safe Abortion Guidance (page 13)

Where mifepristone is not available, the recommended method for medical abortion is misoprostol (regimen differs by gestational age). Safe Abortion Guidelines, Executive Summary, Box 2-Recommendation.

Indicators

Country specific information related to sexual and reproductive health indications. As data for the Sustainable Development Goal (SDG) indicators related to sexual and reproductive health become available, these will be provided, through periodic updates.

Goal 1. End poverty in all its forms everywhere

1.1.1 Proportion of population below the international poverty line, by sex, age, employment status and geographical location (urban/rural)  
No data

1.3.1 Proportion of population covered by social protection floors/systems, by sex, distinguishing children, unemployed persons, older persons, persons with disabilities, pregnant women, newborns, work-injury victims and the poor and the vulnerable  
No data

1.a.2 Proportion of total government spending on essential services (education, health and social protection)  
No data

Goal 3. Ensure healthy lives and promote well-being for all at all ages

3.1.1 Maternal mortality ratio  
4 (2017)

3.1.2 Proportion of births attended by skilled health personnel  
No data

3.7.1 Proportion of women of reproductive age (aged 15-49 years) who have their need for family planning satisfied with modern methods  
No data

3.7.2 Adolescent birth rate (aged 10-14 years; aged 15-19 years) per 1,000 women in that age group  
5.2 (2015-2020)

3.8.2 Number of people covered by health insurance or a public health system per 1,000 population  
No data

3.c.1 Health worker density and distribution  
No data

Goal 4. Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

4.1.1 Proportion of children and young people: (a) in grades 2/3; (b) at the end of primary; and (c) at the end  
No data
of lower secondary achieving at least a minimum proficiency level in (i) reading and (ii) mathematics, by sex

Goal 5. Achieve gender equality and empower all women and girls

5.1.1 Whether or not legal frameworks are in place to promote, enforce and monitor equality and nondiscrimination on the basis of sex

5.2.1 Proportion of ever-partnered women and girls aged 15 years and older subjected to physical, sexual or psychological violence by a current or former intimate partner in the previous 12 months, by form of violence and by age

5.2.2 Proportion of women and girls aged 15 years and older subjected to sexual violence by persons other than an intimate partner in the previous 12 months, by age and place of occurrence
