Persons who can be sanctioned:

- A woman or girl can be sanctioned
- Providers can be sanctioned
- A person who assists can be sanctioned

Abortion at the woman's request

Law Varies By Jurisdiction

Legal Ground and Gestational Limit
### Economic or social reasons

**Who**

Where policies or laws vary by jurisdiction, this is noted with an accompanying note and no interpretation is made.

**Related documents:**
- Dobbs v Jackson Women's Health Organization, 2022 (page 1)

---

### Foetal impairment

**Who**

Where policies or laws vary by jurisdiction, this is noted with an accompanying note and no interpretation is made.

**Related documents:**
- Dobbs v Jackson Women's Health Organization, 2022 (page 1)

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Health grounds shall reflect WHO's definitions of health, which entails a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity. Abortion Care Guideline § 2.2.2.

- **Source document:** WHO Abortion Care Guideline (page 16)

---

### Rape

**Who**

Where policies or laws vary by jurisdiction, this is noted with an accompanying note and no interpretation is made.

**Related documents:**
- Dobbs v Jackson Women's Health Organization, 2022 (page 1)

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Grounds-based approaches to restricting access to abortion should be revised in favour of making abortion available on the request of the woman, girl or other pregnant person. The Abortion Care Guideline recommends against laws and other regulations that restrict abortion by grounds. The guideline recommends abortion be available on the request of the woman, girl or other pregnant person.

Until they are replaced with abortion on request, any existing grounds should be formulated and applied in a manner consistent with international human rights law. This requires that abortion is available when carrying a pregnancy to term would cause the woman, girl or other pregnant person substantial pain or suffering, including but not limited to situations where the pregnancy is not viable.

- **Source document:** WHO Abortion Care Guideline (page 64)

---

### Incest

**Who**

Where policies or laws vary by jurisdiction, this is noted with an accompanying note and no interpretation is made.

**Related documents:**

National guidelines for induced abortion

Yes, guidelines issued by a professional body or non-governmental organization that are endorsed by the government

Related documents:
- USA Second Trimester Guidelines Summary Official ACOG (page 1)

WHO Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

National standards and guidelines for abortion care should be evidence based and periodically updated and should provide the necessary guidance to achieve equal access to comprehensive abortion care. Leadership should also promote evidence-based SRH services according to these standards and guidelines. Abortion Care Guideline § 1.3.3.

Source document: WHO Abortion Care Guideline (page 50)

Additional notes

State issued guidelines vary by jurisdiction. However, some national professional guidelines exist. These include the following:

- American College of Obstetricians and Gynaecologists and Society of Family Planning 2014 guidelines for Medical management of first-trimester abortion (providing professional and clinical guidelines for vacuum aspiration, medical abortion using Mifepristone and Misoprostol, and dilation and evacuation: http://www.acog.org/Resources-And-Publications/Practice-Bulletins/Committee-on-Practice-Bulletins-Gynecology/Medical-Management-of-First-Trimester-Abortion

- American College of Obstetricians and Gynaecologists and Society of Family Planning 2014 guidelines for guidelines for second-trimester abortion are relevant: http://www.acog.org/Resources-And-Publications/Practice-Bulletins/Committee-on-Practice-Bulletins-Gynecology/Second-Trimester-Abortion

Methods allowed

Vacuum aspiration
State issued guidelines vary by jurisdiction. However, some national professional guidelines exist. These include the following:

- American College of Obstetricians and Gynecologists and Society of Family Planning 2014 guidelines for Medical management of first-trimester abortion (providing professional and clinical guidelines for vacuum aspiration, medical abortion using Mifepristone and Misoprostol, and dilation and evacuation: http://www.acog.org/Resources-And-Publications/Practice-Bulletins/Committee-on-Practice-Bulletins-Gynecology/Medical-Management-of-First-Trimester-Abortion

Other (where provided)

WHO Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Vacuum aspiration is recommended for surgical abortions at or under 14 weeks to be provided by traditional and complementary medicine professionals, nurses, midwives, associate/advanced associate clinicians, generalist medical practitioners and specialist medical practitioners.

The Abortion Care Guideline recommends against the practice of dilatation and sharp curettage (D&C), including for sharp curette checks (i.e. to "complete" the abortion) following vacuum aspiration. Abortion Care Guideline § 3.4.1.

- Source document: WHO Abortion Care Guideline (page 101)

Dilation and evacuation (D&E) is recommended for surgical abortions at or over 14 weeks to be provided by generalist medical practitioners and specialist medical practitioners. Vacuum aspiration can be used during a D&E. Abortion Care Guideline § 3.4.1.

- Source document: WHO Abortion Care Guideline (page 103)

The recommended method for medical abortion is mifepristone followed by misoprostol (regimen differs by gestational age). Abortion Care Guideline § 3.4.2.

- Source document: WHO Abortion Care Guideline (page 106)

The Abortion Care Guideline recommends the use of misoprostol alone, with a regime that differs by gestational age. Evidence demonstrates that the use of combination mifepristone plus misoprostol is more effective than misoprostol alone. Abortion Care Guideline § 3.4.2.

- Source document: WHO Abortion Care Guideline (page 106)
Country recognized approval (mifepristone / mife-misoprostol)

### Related documents:
- FDA Mifeprex Label (page 1)
- Mifeprex Information, 2021 (page 1)

### Pharmacy selling or distribution

Yes, with prescription only

In 2021 FDA undertook a full review of the Mifepristone REMS Program. Based on that review, FDA has determined that the REMS will include the following elements: (1) Mifepristone must be prescribed by or under the supervision of a certified healthcare provider who meets certain qualifications, including signing a Prescriber Agreement Form; (2) The healthcare provider must obtain a signed Patient Agreement Form from the patient after counseling and prior to prescribing Mifeprax; (3) Pharmacies that dispense mifepristone must be certified.

- FDA Mifeprex Label (page 1)
- Mifeprex Information, 2021 (page 1)

### WHO Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Mifepristone and misoprostol should be listed in relevant national EMLs (NEMLs) or their equivalent and should be included in the relevant clinical care/service delivery guidelines. Inclusion in the NEML is one important component of ensuring that quality medicines are available.

For induced abortion, Mifepristone (200 mg) and misoprostol (200 μg), are recommended in the WHO EML. The EML specifically mentions the following co-packaged formulation: 1 tablet mifepristone (200 mg) + 4 tablets misoprostol (200 μg).

Restrictions on prescribing authority for some categories of health workers may need to be modified or other mechanisms put in place to make the medicines available for these health workers within the regulatory framework of the health system. Abortion Care Guideline § 1.4.4.

Source document: WHO Abortion Care Guideline (page 55)

Mifepristone and misoprostol should be listed in relevant national EMLs (NEMLs) or their equivalent and should be included in the relevant clinical care/service delivery guidelines. Inclusion in the NEML is one important component of ensuring that quality medicines are available.

Where can abortion services be provided

Varies by Jurisdiction

### WHO Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Where it is lawful, abortion must be accessible in practice. This requires both ensuring that health-care facilities, commodities and services are accessible (including sufficient providers), and that law and policy on abortion is formulated, interpreted and applied in a way that is compatible with human rights. Abortion Care Guideline § 1.3.1.

Source document: WHO Abortion Care Guideline (page 48)

Related documents:

**Additional notes**

State issued guidelines vary by jurisdiction. However, some national professional guidelines exist. These include the following:

- American College of Obstetricians and Gynaecologists and Society of Family Planning 2014 guidelines for Medical management of first-trimester abortion (providing professional and clinical guidelines for vacuum aspiration, medical abortion using Mifepristone and Misoprostol, and dilation and evacuation: [http://www.acog.org/Resources-And-Publications/Practice-Bulletins/Committee-on-Practice-Bulletins-Gynecology/Medical-Management-of-First-Trimester-Abortion](http://www.acog.org/Resources-And-Publications/Practice-Bulletins/Committee-on-Practice-Bulletins-Gynecology/Medical-Management-of-First-Trimester-Abortion)
- American College of Obstetricians and Gynaecologists and Society of Family Planning 2014 guidelines for second-trimester abortion are relevant: [http://www.acog.org/Resources-And-Publications/Practice-Bulletins/Committee-on-Practice-Bulletins-Gynecology/Second-Trimester-Abortion](http://www.acog.org/Resources-And-Publications/Practice-Bulletins/Committee-on-Practice-Bulletins-Gynecology/Second-Trimester-Abortion)

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

The Abortion Care Guideline recommends the option of telemedicine as an alternative to in-person interactions with the health worker to deliver medical abortion services in whole or in part. Telemedicine services should include referrals (based on the woman’s location) for medicines (abortion and pain control medicines), any abortion care or post-abortion follow-up required (including for emergency care if needed), and for post-abortion contraceptive services. Abortion Care Guideline § 3.6.1.

**Additional notes**

The American College of Obstetricians and Gynaecologists and Society of Family Planning 2014 guidelines for Medical management of first-trimester abortion also provide some guidance on contraception post abortion:

- [http://www.acog.org/Resources-And-Publications/Practice-Bulletins/Committee-on-Practice-Bulletins-Gynecology/Medical-Management-of-First-Trimester-Abortion](http://www.acog.org/Resources-And-Publications/Practice-Bulletins/Committee-on-Practice-Bulletins-Gynecology/Medical-Management-of-First-Trimester-Abortion)

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

All contraceptive options may be considered after an abortion. For individuals undergoing surgical abortion and wishing to use contraception, Abortion Care Guideline recommends the option of initiating the contraception at the time of surgical abortion. For individuals undergoing medical abortion, for those who choose to use hormonal contraception, the Abortion Care Guideline suggests that they be given the option of starting hormonal contraception immediately after the first pill of the medical abortion regimen. For those who choose to have an IUD inserted, Abortion Care Guideline suggests IUD placement at the time that success of the abortion procedure is determined. Abortion Care Guideline § 3.5.4.

**Additional notes**

The American College of Obstetricians and Gynaecologists and Society of Family Planning 2014 guidelines for Medical management of first-trimester abortion also provide some guidance on contraception post abortion:

- [http://www.acog.org/Resources-And-Publications/Practice-Bulletins/Committee-on-Practice-Bulletins-Gynecology/Medical-Management-of-First-Trimester-Abortion](http://www.acog.org/Resources-And-Publications/Practice-Bulletins/Committee-on-Practice-Bulletins-Gynecology/Medical-Management-of-First-Trimester-Abortion)

**Conscientious Objection**

**Insurance to offset end user costs**

Varies by Jurisdiction

Where user fees are charged for abortion, this should be based on careful consideration of ability to pay, and fee waivers should be available for those who are facing financial hardship and adolescent abortion seekers. As far as possible, abortion services and supplies should be mandated for coverage under insurance plans as inability to pay is not an acceptable reason to deny or delay abortion care. Furthermore, having transparent procedures in all health-care facilities can ensure that informal charges are not imposed by staff. Abortion Care Guideline § 1.4.2.

**Who can provide abortion services**

Varies by Jurisdiction

Specialist doctor, including OB/GYN

Yes

Not applicable

*WHO Guidance*

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

The Abortion Care Guideline recommends against regulation on who can provide and manage abortion that is inconsistent with WHO guidance. Abortion Care Guideline § 3.3.8.

*Source document:* WHO Abortion Care Guideline (page 97)

**Related documents:**
- Dobbs v Jackson Women's Health Organization, 2022 (page 1)

**Extra facility/provider requirements for delivery of abortion services**

Varies by Jurisdiction

**Referral linkages to a higher-level facility**

Varies by Jurisdiction

*WHO Guidance*

There is no single recommended approach to providing abortion services. The choice of specific health worker(s) (from among the recommended options) or management by the individual themselves, and the location of service provision (from among recommended options) will depend on the values and preferences of the woman, girl or other pregnant person, available resources, and the national and local context. A plurality of service-delivery approaches can co-exist within any given context. Given that service-delivery approaches can be diverse, it is important to ensure that for the individual seeking care, the range of service-delivery options taken together will provide access to scientifically accurate, understandable information at all stages; access to quality-assured medicines (including those for pain management); back-up referral support if desired or needed; linkages to an appropriate choice of contraceptive services for those who want post-abortion contraception. Best Practice Statement 49 on service delivery. Abortion Care Guideline § 3.6.1.

#### WHO Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Where it is lawful, abortion must be accessible in practice. This requires both ensuring that health-care facilities, commodities and services are accessible (including sufficient providers), and that law and policy on abortion is formulated, interpreted and applied in a way that is compatible with human rights. Abortion Care Guideline § 1.3.1.

### Indicators

Country specific information related to sexual and reproductive health indicators. As data for the Sustainable Development Goal (SDG) indicators related to sexual and reproductive health become available, these will be provided, through periodic updates.

#### Goal 1. End poverty in all its forms everywhere

1.1.1 Proportion of population below the international poverty line, by sex, age, employment status and geographical location (urban/rural)

No data

1.3.1 Proportion of population covered by social protection floors/systems, by sex, distinguishing children, unemployed persons, older persons, persons with disabilities, pregnant women, newborns, work-injury victims and the poor and the vulnerable

No data
Goal 3. Ensure healthy lives and promote well-being for all at all ages

3.1.1 Maternal mortality ratio

19 (2017)

3.1.2 Proportion of births attended by skilled health personnel

No data

3.7.1 Proportion of women of reproductive age (aged 15-49 years) who have their need for family planning satisfied with modern methods

No data

3.7.2 Adolescent birth rate (aged 10-14 years; aged 15-19 years) per 1,000 women in that age group

18.5 (2015)

3.8.2 Number of people covered by health insurance or a public health system per 1,000 population

No data

3.c.1 Health worker density and distribution

No data

Goal 4. Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

4.1.1 Proportion of children and young people: (a) in grades 2/3; (b) at the end of primary; and (c) at the end of lower secondary achieving at least a minimum proficiency level in (i) reading and (ii) mathematics, by sex

No data

Goal 5. Achieve gender equality and empower all women and girls

5.1.1 Whether or not legal frameworks are in place to promote, enforce and monitor equality and nondiscrimination on the basis of sex

No data

5.2.1 Proportion of ever-partnered women and girls aged 15 years and older subjected to physical, sexual or psychological violence by a current or former intimate partner in the previous 12 months, by form of violence and by age

No data

5.2.2 Proportion of women and girls aged 15 years and older subjected to sexual violence by persons other than an intimate partner in the previous 12 months, by age and place of occurrence

No data

5.3.1 Proportion of women aged 20-24 years who were married or in a union before age 15 and before age 18

No data

5.3.2 Proportion of girls and women aged 15-49 years who have undergone female genital mutilation/cutting, by age

No data

5.6.1 Proportion of women aged 15-49 years who make their own informed decisions regarding sexual relations, contraceptive use and reproductive health care

No data

5.6.2 Number of countries with laws and regulations that guarantee women aged 15-49 years access to sexual and reproductive health care, information and education

No data

5.a.1 (a) Proportion of total agricultural population with ownership or secure rights over agricultural land, by sex; and (b) share of women among owners or rights-bearers of agricultural land, by type of tenure

No data

5.b.1 Proportion of individuals who own a mobile telephone, by sex

No data

Goal 8. Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

8.5.2 Unemployment rate, by sex, age and persons with disabilities

No data

Goal 10. Reduce inequality within and among countries

10.2.1 Proportion of people living below 50 per cent of median income, by age, sex and persons with disabilities

No data

10.3.1 Proportion of the population reporting having personally felt discriminated against or harassed within the previous 12 months on the
Goal 16. Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels

16.1.3 Proportion of population subjected to physical, psychological or sexual violence in the previous 12 months

16.2.2 Number of victims of human trafficking per 100,000 population, by sex, age and form of exploitation

16.2.3 Proportion of young women and men aged 18-29 years who experienced sexual violence by age 18

16.3.1 Proportion of victims of violence in the previous 12 months who reported their victimization to competent authorities or other officially recognized conflict resolution mechanisms

16.5.1 Proportion of persons who had at least one contact with a public official and who paid a bribe to a public official, or were asked for a bribe by those public officials, during the previous 12 months

16.6.1 Primary government expenditures as a proportion of original approved budget, by sector (or by budget codes or similar)

16.6.2 Proportion of the population satisfied with their last experience of public services

16.7.1 Proportions of positions (by sex, age, persons with disabilities and population groups) in public institutions (national and local legislatures, public service, and judiciary) compared to national distributions

16.9.1 Proportion of children under 5 years of age whose births have been registered with a civil authority, by age

16.10.1 Number of verified cases of killing, kidnapping, enforced disappearance, arbitrary detention and torture of journalists, associated media personnel, trade unionists and human rights advocates in the previous 12 months

16.b.1 Proportion of population reporting having personally felt discriminated against or harassed in the previous 12 months on the basis of a ground of discrimination prohibited under international human rights law

Goal 17. Strengthen the means of implementation and revitalize the Global Partnership for Sustainable Development

17.8.1 Proportion of individuals using the Internet

Additional Reproductive Health Indicators

Percentage of married women with unmet need for family planning

Percentage of births attended by trained health professional

Percentage of women aged 20-24 who gave birth before age 18

Total fertility rate

Legal marital age for women, with parental consent

Legal marital age for women, without parental consent
