Additional Requirements to Access Safe Abortion

Authorization of health professional(s)

- **Varies by jurisdiction**
  
  Where policies or laws vary by jurisdiction, this is noted with an accompanying note and no interpretation is made.

WHO Guidance

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

Third-party authorization should not be required for women to obtain abortion services. The requirement for authorization by hospital authorities may violate the right to privacy and women's access to health care on the basis of equality of men and women. Safe Abortion Guidelines, § 4.2.2.2.

### Authorization in specially licensed facilities only

- **Varies by jurisdiction**
  - Where policies or laws vary by jurisdiction, this is noted with an accompanying note and no interpretation is made.

### WHO Guidance

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

Restrictions on the range of providers or facilities that are authorized to provide abortion reduce the availability of services and their equitable geographic distribution. Safe Abortion Guidelines, § 4.2.2.4.

- **Source document**: WHO Safe Abortion Guidance (page 106)

### Additional notes

Abortion is governed by the Supreme Court decisions Roe v. Wade and Planned Parenthood v. Casey, which established a woman's right to terminate her pregnancy. States may impose a variety of limitations on access in the interest of protecting women's health and promoting potential life, and may completely proscribe abortion post-viability as long as there is an exception for the woman's life or health.

Many states regulate the facilities where abortions are provided, leading to significant inter-state variation in the requirements for licensed facilities. In a decision set down on the 27 June 2016, titled Whole Women's Health et al, petitioners v John Hellerstedt, Commissioner, Texas, Dept. of State Health the Supreme Court found certain types of restrictions and requirements to be unconstitutional.

### Prohibition of sex-selective abortion

- **Varies by jurisdiction**
  
  Where policies or laws vary by jurisdiction, this is noted with an accompanying note and no interpretation is made.

- **WHO Guidance**
  
  The following descriptions and recommendations were extracted from WHO guidance on safe abortion.
  
  In situations where abortion is restricted for sex selection purposes, terminating a pregnancy for this reason is likely to involve an unsafe procedure carrying high risks. Any policies or guidelines on the use of technology in obstetric and fetal medicine should take into account the need to ensure women’s access to safe abortion and other services - efforts to manage or limit sex selection should also not hamper or limit access to safe abortion services. Preventing gender-biased sex selection: an interagency statement, p 10 - Recommendation.

  - **Source document**: Preventing Gender-Biased Sex Selection (page 17)

- **Additional notes**
  
  Although no national restriction is established there are a few states that explicitly prohibit sex-selective abortion, including for example Illinois.

| Individual health-care providers who have objected are required to refer the woman to another provider | Abortion is governed by the Supreme Court decisions Roe v. Wade and Planned Parenthood v. Health-care professionals who claim conscientious objection must refer the woman to another willing and trained provider in the same, or another easily accessible health-care facility. Where referral is not possible, the health-care professional who objects, must provide safe abortion to save the woman's life, to prevent serious injury to her health and provide urgent care when women present with complications from an unsafe or illegal abortion.
