WHO Guidance

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

WHO defines health for member states as a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity. Safe Abortion Guidelines, § 4.2.1.5.

Source document: WHO Safe Abortion Guidance (page 103)
Conflict between sources

WHO Guidance

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

A woman is entitled to know the status of her pregnancy and to act on this information; health protection or social reasons can be interpreted to include distress of the pregnant woman caused by the diagnosis of fetal impairment. Prenatal tests and other medical diagnostic services cannot legally be refused because the woman may decide to terminate her pregnancy. Safe Abortion Guidelines, § 4.2.1.4.

Source document: WHO Safe Abortion Guidance (page 103)

Additional notes

The Angolan constitution stipulates that international treaties become binding following their formal publication and entry in force. The Maputo Protocol, authorizing abortion “where the continued pregnancy endangers the life of the mother or the foetus” was ratified by the Republic of Angola. The more recent Angolan Penal Code, however, does not mention foetal impairment as a ground for abortion. It stipulates that abortion can be performed in cases where foetal non-viability is attested, and indicates that penalties for abortion can be mitigated in cases where there are strong reasons to predict that the unborn child will suffer from incurable serious illness or malformation and the abortion is undertaken within the first 24 weeks of pregnancy.

- International Human Rights Conventions (page 1)

WHO Guidance

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

The protection of women from cruel, inhuman and degrading treatment requires that those who have become pregnant as the result of coerced or forced sexual acts can lawfully access safe abortion services. Prompt, safe abortion services should be provided on the basis of a woman’s complaint rather than requiring forensic evidence or police examination. Safe Abortion Guidelines, § 4.2.1.3.

Source document: WHO Safe Abortion Guidance (page 102)

Additional notes

Rape and incest are not specifically mentioned in the Penal Code in the section on abortion. However, the Penal Code permits abortion in case of pregnancy as result of crime against freedom and sexual self-determination. The gestational age limit for an abortion on this ground is 16 weeks.

Incest

No

Related documents:

### Health

- **No**

#### WHO Guidance

The fulfillment of human rights requires that women can access safe abortion when it is indicated to protect their health. WHO defines health for member states as a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity. Safe Abortion Guidelines, § 4.2.1.2.

### Number and cadre of health-care professional authorizations required

1 Doctor (Specialty Not Specified)

This authorization is in addition to the provider. Additional authorization requires that a certification by a medical report, written and signed, before the interruption can be carried by the provider.

When the pregnancy is the result of a crime against sexual freedom and self-determination, exclusion from criminal liability can only be verified upon the presentation of a certificate from the Public Prosecutor’s Office on the pendency of the corresponding case, accompanied by an examination of the corpus delicti and a medical report issued by the competent health authority, attesting that the pregnancy resulted from a violation of the woman's sexual freedom or self-determination.

Authorization is not required in case of an emergency.

- Penal Code, 2019 (page 25)

### WHO Guidance

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

Third-party authorization should not be required for women to obtain abortion services. The requirement for authorization by hospital authorities may violate the right to privacy and women's access to health care on the basis of equality of men and women. Safe Abortion Guidelines, § 4.2.2.2.

- Source document: WHO Safe Abortion Guidance (page 105)

### Additional notes

The CEDEAO/ECOWAS Harmonised Code of Ethics and Practice (2013) (which has no indication of being an official government document) states in Article 21 in Section I (general duties of practitioners): "Voluntary interruption of pregnancy cannot be practiced unless otherwise provided for by law. However, the practitioner is always free to refuse to perform such an act, but he should inform the person concerned of the condition and month of pregnancy as provided for by law." However, in Section V which deals with practitioners' duties towards patients, the Code states in Article 141: "A therapeutic abortion may be performed if the intervention is the only means to save the life of the mother. When the safety of the mother that is seriously threatened requires a termination of pregnancy or the utilization of a therapeutic intervention that is capable of interrupting the pregnancy, the practitioner must consult at least two other doctors chosen for their competence, who, after review of the case, should jointly make a decision. A copy of the report of the consultation should be given to the patient and a copy kept by each of the two consultants. Also a memorandum of the decision that does not mention the name of the patient must be sent by registered mail to the Council. If there is a therapeutic indication for the termination of pregnancy, the practitioner must yield to any refusal by the patient who is duly informed. This rule does not apply in the case of emergency and when the patient is incapable of giving consent." The Code of Ethics is accessible at: http://www.medecins-ci/documents/Code-Harmonise-CEDEAO.pdf.

**WHO Guidance**

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

In situations where abortion is restricted for sex selection purposes, terminating a pregnancy for this reason is likely to involve an unsafe procedure carrying high risks. Any policies or guidelines on the use of technology in obstetric and fetal medicine should take into account the need to ensure women’s access to safe abortion and other services - efforts to manage or limit sex selection should also not hamper or limit access to safe abortion services. Preventing gender-biased sex selection: an interagency statement, p 10 - Recommendation.

**List of restrictions**

Article 159 (Propaganda favorable to termination of pregnancy) 1- It is punished with imprisonment for up to 1 year or with a fine of up to 120 days, whoever, through publicity means or in public meetings, with the aim of obtaining an advantage: a) Offer its own services or those of others, with a view to terminating the pregnancy; b) Advertise procedures, means or objects suitable for terminating a pregnancy. 2- The prohibition of the previous number does not cover activities aimed at making known and promoting the procedures, objects and means referred to therein, through informative or scientific articles or other medical or pharmaceutical publications, namely prospectuses related to medicines or surgical instruments, nor the explanations given by those who want to sell them, to doctors or qualified personnel, namely nurses from health establishments authorized to interrupt a pregnancy.

Article 160 (Circulation of means for termination of pregnancy) Whoever receives or transmits, for any reason, means intended for the termination of pregnancy, with the intention of promoting the practice of the facts provided for in articles 156 and 157, is punished with imprisonment for up to 1 year or a fine of up to 120 days.

**WHO Guidance**

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

States should refrain from limiting access to means of maintaining sexual and reproductive health, including censoring, withholding or intentionally misrepresenting health-related information. Safe Abortion Guidelines, § 4.2.2.7.

**WHO Guidance**

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

Vacuum aspiration is the recommended technique of surgical abortion for pregnancies of up to 12 to 14 weeks of gestation. The procedure should not be routinely completed by dilatation and sharp curettage (D&C). Safe Abortion Guidelines, Executive Summary, Box 1- Recommendation.

**Source document:** WHO Safe Abortion Guidance (page 123)

Dilatation and evacuation (D&E) and medical methods (mifepristone and misoprostol; misoprostol alone) are both recommended methods for abortion for gestations over 12 to 14 weeks. Safe Abortion Guidelines, Executive Summary, Box 3- Recommendation.

**Source document:** WHO Safe Abortion Guidance (page 123)

The recommended method for medical abortion is mifepristone followed by misoprostol (regimen differs by gestational age). Safe Abortion Guidelines, Executive Summary, Box 2- Recommendation.

**Source document:** WHO Safe Abortion Guidance (page 13)

Where mifepristone is not available, the recommended method for medical abortion is misoprostol (regimen differs by gestational age). Safe Abortion Guidelines, Executive Summary, Box 2- Recommendation.

**Source document:** WHO Safe Abortion Guidance (page 14)

The combination of mifepristone and misoprostol for medical abortion is included on the WHO model list of essential medicines. Safe Abortion Guidelines, § 2.2.5

**Source document:** WHO Safe Abortion Guidance (page 54)

Chemists/pharmacists can help women avoid unintended pregnancy through provision of accurate contraceptive information, pregnancy tests, contraceptive methods and referral to safe abortion services. Safe Abortion Guidelines, § 3.3.1.1.

**Source document:** WHO Safe Abortion Guidance (page 13)

It is possible that the national list of essential medicines may provide pertinent information on the dispensing of Misoprostol, but this could not be ascertained due to the fact that the text could not be translated.

---

### WHO Guidance

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

Health-care professionals who claim conscientious objection must refer the woman to another willing and trained provider in the same, or another easily accessible health-care facility. Where referral is not possible, the health-care professional who objects, must provide safe abortion to save the woman's life, to prevent serious injury to her health and provide urgent care when women present with complications from an unsafe or illegal abortion. Safe Abortion Guidelines, § 4.2.2.5.

**Source document:** WHO Safe Abortion Guidance (page 106)

---

### Additional notes

The Medical Ethics Code states that no doctor can be required to perform medical procedures against his or her will and that a doctor has the right to refuse the act of practice of their profession, such as practice conflicts with the provisions of this code. This is not specific to abortion care, nor is abortion mentioned in the Code.

**Related documents:**

<tr>
<td>Health-care professionals who claim conscientious objection must refer the woman to another willing and trained provider in the same, or another easily accessible health-care facility. Where referral is not possible, the health-care professional who objects, must provide safe abortion to save the woman's life, to prevent serious injury to her health and provide urgent care when women present with complications from an unsafe or illegal abortion. Safe Abortion Guidelines, § 4.2.2.5.</td>

Indicators

Country specific information related to sexual and reproductive health indications. As data for the Sustainable Development Goal (SDG) indicators related to sexual and reproductive health become available, these will be provided, through periodic updates.

Goal 1. End poverty in all its forms everywhere

1.1.1 Proportion of population below the international poverty line, by sex, age, employment status and geographical location (urban/rural) [No data]

1.3.1 Proportion of population covered by social protection floors/systems, by sex, distinguishing children, unemployed persons, older persons, persons with disabilities, pregnant women, newborns, work-injury victims and the poor and the vulnerable [No data]

1.a.2 Proportion of total government spending on essential services (education, health and social protection) [No data]

Goal 3. Ensure healthy lives and promote well-being for all at all ages

3.1.1 Maternal mortality ratio [241 (2016)]

3.1.2 Proportion of births attended by skilled health personnel [No data]

3.7.1 Proportion of women of reproductive age (aged 15-49 years) who have their need for family planning satisfied with modern methods [No data]

3.7.2 Adolescent birth rate (aged 10-14 years; aged 15-19 years) per 1,000 women in that age group [151.6 (2015-2020)]

3.8.2 Number of people covered by health insurance or a public health system per 1,000 population [No data]

3.c.1 Health worker density and distribution [No data]

Goal 4. Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

4.1.1 Proportion of children and young people: (a) in grades 2/3; (b) at the end of primary; and (c) at the end of lower secondary achieving at least a minimum proficiency level in (i) reading and (ii) mathematics, by sex [No data]

Goal 5. Achieve gender equality and empower all women and girls

5.1.1 Whether or not legal frameworks are in place to promote, enforce and monitor equality and nondiscrimination on the basis of sex [No data]

5.2.1 Proportion of ever-partnered women and girls aged 15 years and older subjected to physical, sexual or psychological violence by a current or former intimate partner in the previous 12 months, by form of violence and by age [No data]

5.2.2 Proportion of women and girls aged 15 years and older subjected to sexual violence by persons other than an intimate partner in the previous 12 months, by age and place of occurrence [No data]

5.3.1 Proportion of women aged 20-24 years who were married or in a union before age 15 and before age 18 [No data]
5.3.2 Proportion of girls and women aged 15-49 years who have undergone female genital mutilation/cutting, by age

No data

5.6.1 Proportion of women aged 15-49 years who make their own informed decisions regarding sexual relations, contraceptive use and reproductive health care

No data

5.6.2 Number of countries with laws and regulations that guarantee women aged 15-49 years access to sexual and reproductive health care, information and education

No data

5.a.1 (a) Proportion of total agricultural population with ownership or secure rights over agricultural land, by sex; and (b) share of women among owners or rights-bearers of agricultural land, by type of tenure

No data

5.b.1 Proportion of individuals who own a mobile telephone, by sex

No data

Goal 8. Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

8.5.2 Unemployment rate, by sex, age and persons with disabilities

No data

Goal 10. Reduce inequality within and among countries

10.2.1 Proportion of people living below 50 per cent of median income, by age, sex and persons with disabilities

No data

10.3.1 Proportion of the population reporting having personally felt discriminated against or harassed within the previous 12 months on the basis of a ground of discrimination prohibited under international human rights law

No data

Goal 16. Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels

16.1.3 Proportion of population subjected to physical, psychological or sexual violence in the previous 12 months

No data

16.2.1 Proportion of individuals who own a mobile telephone, by sex

No data

16.2.2 Number of victims of human trafficking per 100,000 population, by sex, age and form of exploitation

No data

16.2.3 Proportion of young women and men aged 18-29 years who experienced sexual violence by age 18

No data

16.3.1 Proportion of victims of violence in the previous 12 months who reported their victimization to competent authorities or other officially recognized conflict resolution mechanisms

No data

16.5.1 Proportion of persons who had at least one contact with a public official and who paid a bribe to a public official, or were asked for a bribe by those public officials, during the previous 12 months

No data

16.6.1 Primary government expenditures as a proportion of original approved budget, by sector (or by budget codes or similar)

No data

16.6.2 Proportion of the population satisfied with their last experience of public services

No data

16.7.1 Proportions of positions (by sex, age, persons with disabilities and population groups) in public institutions (national and local legislatures, public service, and judiciary) compared to national distributions

No data

16.9.1 Proportion of children under 5 years of age whose births have been registered with a civil authority, by age

No data

16.10.1 Number of verified cases of killing, kidnapping, enforced disappearance, arbitrary detention and torture of journalists, associated media personnel, trade unionists and human rights advocates in the previous 12 months

No data

16.b.1 Proportion of population reporting having personally felt discriminated against or harassed in the previous 12 months on the basis of a ground of discrimination prohibited under international human rights law

No data

Goal 17. Strengthen the means of implementation and revitalize the Global Partnership for Sustainable Development

17.8.1 Proportion of individuals using the Internet

No data
