The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

The protection of women from cruel, inhuman and degrading treatment requires that those who have become pregnant as the result of coerced or forced sexual acts can lawfully access safe abortion services. Prompt, safe abortion services should be provided on the basis of a woman’s complaint rather than requiring forensic evidence or police examination. Safe Abortion Guidelines, § 4.2.1.3.

**Source document:** WHO Safe Abortion Guidance (page 102)

Laws or policies that impose time limits on the length of pregnancy may have negative consequences for women, including forcing them to seek clandestine abortions and suffer social inequities. Safe Abortion Guidelines, § 4.2.1.7.

**Source document:** WHO Safe Abortion Guidance (page 103)

**Additional notes**

Mental health is not explicitly stated as a ground on which abortion is permitted. But the 2011 Guidelines and Standards on Medicalised Abortion state that, in accordance with the Law on Sexual and Reproductive Health, situations of rape, incest or a diagnosis of fetal malformation must be interpreted explicitly under the rubric of “mental health” as these cases highlight the psychological distress of the concerned woman.

### Incest

**Yes**

**Related documents:**

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

**WHO Guidance**

The human right to life requires protection by law, including when pregnancy is life-threatening or a pregnant woman’s life is otherwise endangered. Both medical and social conditions can constitute life-threatening conditions. Safe Abortion Guidelines, § 4.2.1.1.

**Source document:** WHO Safe Abortion Guidance (page 102)

Laws or policies that impose time limits on the length of pregnancy may have negative consequences for women, including forcing them to seek clandestine abortions and suffer social inequities. Safe Abortion Guidelines, § 4.2.1.7.

**Source document:** WHO Safe Abortion Guidance (page 103)

**Additional notes**

The CEDEAO/ECOWAS Harmonised Code of Ethics and Practice (2013) (which has no indication of being an official government document) states in Article 21 in Section I (general duties of practitioners): "Voluntary interruption of pregnancy cannot be practiced unless otherwise provided for by law. However, the practitioner is always free to refuse to perform such an act, but he should inform the person concerned of the condition and month of pregnancy as provided for by law." However, in Section V which deals with practitioners’ duties towards patients, the Code states in Article 141: “A therapeutic abortion may be performed if the intervention is the only means to save the life of the mother. When the safety of the mother that is seriously threatened requires a termination of pregnancy or the utilization of a therapeutic intervention that is capable of interrupting the pregnancy, the practitioner must consult at least two other doctors chosen for their competence, who, after review of the case, should jointly make a decision. A copy of the report of the consultation should be given to the patient and a copy kept by each of the two consultants. Also a memorandum of the decision that does not mention the name of the patient must be sent by registered mail to the Council. If there is a therapeutic indication for the termination of pregnancy, the practitioner must yield to any refusal by the patient who is duly informed. This rule does not apply in the case of emergency and when the patient is incapable of giving consent." The Code of Ethics is accessible at: http://www.medecins.ci/documents/Code-Harmonise-CEDEAO.pdf.

Doctor (Specialty Not Specified)

The CEDEAO/ECOWAS Harmonised Code of Ethics and Practice (2013) (which has no indication of being an official government document) states in Article 21 in Section I (general duties of practitioners): "Voluntary interruption of pregnancy cannot be practiced unless otherwise provided for by law. However, the practitioner is always free to refuse to perform such an act, but he should inform the person concerned of the condition and month of pregnancy as provided for by law." However, in Section V which deals with practitioners’ duties towards patients, the Code states in Article 141: “A therapeutic abortion may be performed if the intervention is the only means to save the life of the mother. When the safety of the mother that is seriously threatened requires a termination of pregnancy or the utilization of a therapeutic intervention that is capable of interrupting the pregnancy, the practitioner must consult at least two other doctors chosen for their competence, who, after review of the case, should jointly make a decision. A copy of the report of the consultation should be given to the patient and a copy kept by each of the two consultants. Also a memorandum of the decision that does not mention the name of the patient must be sent by registered mail to the Council. If there is a therapeutic indication for the termination of pregnancy, the practitioner must yield to any refusal by the patient who is duly informed. This rule does not apply in the case of emergency and when the patient is incapable of giving consent." The Code of Ethics is accessible at: http://www.medecins.ci/documents/Code-Harmonise-CEDEAO.pdf.

**Additional notes**

- Law on Sexual and Reproductive Health 2003 (page 18)

**WHO Guidance**

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

---
Third-party authorization should not be required for women to obtain abortion services. The requirement for authorization by hospital authorities may violate the right to privacy and women’s access to health care on the basis of equality of men and women. Safe Abortion Guidelines, § 4.2.2.2.

**Additional notes**

The Children's Code 2015 provides that abortion is authorised in the case of a minor where pregnancy constitutes an obstacle to her development. Authorisation is provided by the registrar upon presentation of an examination carried out by a qualified health centre physician. The request is made by the parents. If the girl has the "faculty of discernment" her consent is required.

The CEDEAO/ECOWAS Harmonised Code of Ethics and Practice (2013) (which has no indication of being an official government document) states in Article 21 in Section I (general duties of practitioners): "Voluntary interruption of pregnancy cannot be practiced unless otherwise provided for by law. However, the practitioner is always free to refuse to perform such an act, but he should inform the person concerned of the condition and month of pregnancy as provided for by law." However, in Section V which deals with practitioners' duties towards patients, the Code states in Article 141: "A therapeutic abortion may be performed if the intervention is the only means to save the life of the mother. ### WHO Guidance

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

Third-party authorization should not be required for women to obtain abortion services. Safe Abortion Guidelines, § 4.2.2.

**Source document:** WHO Safe Abortion Guidance (page 105)

### Additional notes

The Children's Code 2015 provides that abortion is authorised in the case of a minor where pregnancy constitutes an obstacle to her development. Authorisation is provided by the registrar upon presentation of an examination carried out by a qualified health centre physician. The request is made by the parents. If the girl has the "faculty of discernment" her consent is required.
Police report required in case of rape

- **Not specified**
  - When there is no explicit reference to an issue covered in the questionnaire in the relevant document(s), this is noted and no interpretation was made.

**Related documents:**
- Law on Sexual and Reproductive Health 2003
- Medicalised Abortion Guidelines and Standards

**WHO Guidance**

- The following descriptions and recommendations were extracted from WHO guidance on safe abortion.
  - Laws, policies and practices that restrict access to abortion information and services can deter women from care seeking and create a “chilling effect” (suppression of actions because of fear of reprisals or penalties) for the provision of safe, legal services. Examples of barriers include: requiring third-party authorization from one or more medical professionals or a hospital committee, court or police, parent or guardian or a woman’s partner or spouse. Safe Abortion Guidelines, § 4.2.2

  - **Source document:** WHO Safe Abortion Guidance (page 104)

Parental consent required for minors

- **No**

**Related documents:**
- Law on the Child 2015 (page 33)

**WHO Guidance**

- The following descriptions and recommendations were extracted from WHO guidance on safe abortion.
  - Third-party authorization should not be required for women to obtain abortion services. The requirement for authorization by parents may violate the right to privacy and women’s access to health care on the basis of equality of men and women. Safe Abortion Guidelines, § 4.2.2.2.

  - **Source document:** WHO Safe Abortion Guidance (page 105)

**Additional notes**

- The Children’s Code 2015 provides that abortion is authorised in the case of a minor where pregnancy constitutes an obstacle to her development. Authorisation is provided by the registrar upon presentation of an examination carried out by a qualified health centre physician. The request is made by the parents. If the girl has the “faculty of discernment” her consent is required.

Spousal consent

- **Not specified**
  - When there is no explicit reference to an issue covered in the questionnaire in the relevant document(s), this is noted and no interpretation was made.

Compulsory counselling

When there is no explicit reference to an issue covered in the questionnaire in the relevant document(s), this is noted and no interpretation was made.

Related documents:
- Law on Sexual and Reproductive Health 2003
- Medicalised Abortion Guidelines and Standards

WHO Guidance
The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

Regulatory, policy and programmatic barriers, one example of which is the requirement for mandatory ultrasound prior to abortion, that hinder access to and timely provision of safe abortion care should be removed. Safe Abortion Guidelines, Executive Summary, Box 7 - Recommendation.

Source document: WHO Safe Abortion Guidance (page 19)

Compulsory waiting period

Not specified
When there is no explicit reference to an issue covered in the questionnaire in the relevant document(s), this is noted and no interpretation was made.

Related documents:
- Law on Sexual and Reproductive Health 2003
- Medicalised Abortion Guidelines and Standards

WHO Guidance
The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

Many women have made a decision to have an abortion before seeking care, and this decision should be respected without subjecting a woman to mandatory counselling. Provision of counselling to women who desire it should be voluntary, confidential, non-directive and by a trained person. Safe Abortion Guidelines, § 2.1.8.1.

Source document: WHO Safe Abortion Guidance (page 46)

Mandatory HIV screening test

Not specified
When there is no explicit reference to an issue covered in the questionnaire in the relevant document(s), this is noted and no interpretation was made.

Related documents:
- Medicalised Abortion Guidelines and Standards

WHO Guidance
The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

States should consider eliminating waiting periods that are not medically required, and expanding services to serve all eligible women promptly. Safe Abortion Guidelines, § 4.2.2.6.

Source document: WHO Safe Abortion Guidance (page 107)

Additional notes

Requirements for HIV and other tests that are not clinically indicated are potential service-delivery barriers. Safe Abortion Guidelines, p 88.
Screening for STIs is part of the initial consultation. The guidelines do not indicate whether this is mandatory or optional.

### Related documents:
- Medicalised Abortion Guidelines and Standards (page 14)

### Other mandatory STI screening tests

**Not specified**

When there is no explicit reference to an issue covered in the questionnaire in the relevant document(s), this is noted and no interpretation was made.

### Related documents:
- Medicalised Abortion Guidelines and Standards

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

Requirements for HIV and other tests that are not clinically indicated are potential service-delivery barriers. Safe Abortion Guidelines, p 88.

**Source document:** WHO Safe Abortion Guidance (page 88)

### Prohibition of sex-selective abortion

**Not specified**

When there is no explicit reference to an issue covered in the questionnaire in the relevant document(s), this is noted and no interpretation was made.

### Related documents:
- Law on Sexual and Reproductive Health 2003
- Medicalised Abortion Guidelines and Standards

**WHO Guidance**

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

In situations where abortion is restricted for sex selection purposes, terminating a pregnancy for this reason is likely to involve an unsafe procedure carrying high risks. Any policies or guidelines on the use of technology in obstetric and fetal medicine should take into account the need to ensure women’s access to safe abortion and other services - efforts to manage or limit sex selection should also not hamper or limit access to safe abortion services. Preventing gender-biased sex selection: an interagency statement, p 10 - Recommendation.

**Source document:** Preventing Gender-Biased Sex Selection (page 17)

### Restrictions on information provided to the public

No data found

**WHO Guidance**

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

States should refrain from limiting access to means of maintaining sexual and reproductive health, including censoring, withholding or intentionally misrepresenting health-related information. Safe Abortion Guidelines, § 4.2.2.7.

**Source document:** WHO Safe Abortion Guidance (page 107)

### Restrictions on methods to detect sex of the foetus

No data found

**WHO Guidance**

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

A woman is entitled to know the status of her pregnancy and to act on this information. Prenatal tests and other medical diagnostic services cannot legally be refused because the woman may decide to terminate her pregnancy. Safe Abortion Guidelines, § 4.2.1.4.

Other (where provided)

- foeticide

Feticide is referred to as the method applicable for abortions after 20 weeks of gestation. While not setting out an upper limit as such, the Guidelines and Standards refer to 'abortion' as 'l'expulsion de l'œuf avant la 28ème SA.'

Related documents:
- Medicalised Abortion Guidelines and Standards (page 1)
- WHO Guidance

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

Vacuum aspiration is the recommended technique of surgical abortion for pregnancies of up to 12 to 14 weeks of gestation. The procedure should not be routinely completed by dilatation and sharp curettage (D&C). Safe Abortion Guidelines, Executive Summary, Box 1- Recommendation.

Source document: WHO Safe Abortion Guidance (page 75)

Dilatation and evacuation (D&E) and medical methods (mifepristone and misoprostol; misoprostol alone) are both recommended methods for abortion for gestations over 12 to 14 weeks. Safe Abortion Guidelines, Executive Summary, Box 3- Recommendation.

Source document: WHO Safe Abortion Guidance (page 123)

The recommended method for medical abortion is mifepristone followed by misoprostol (regimen differs by gestational age). Safe Abortion Guidelines, Executive Summary, Box 2- Recommendation.

Source document: WHO Safe Abortion Guidance (page 13)

Where mifepristone is not available, the recommended method for medical abortion is misoprostol (regimen differs by gestational age). Safe Abortion Guidelines, Executive Summary, Box 2- Recommendation.

Doctor (specialty not specified)

Yes

The CEDEAO/ECOWAS Harmonised Code of Ethics and Practice (2013) (which has no indication of being an official government document) states in Article 21 in Section I (general duties of practitioners): "Voluntary interruption of pregnancy cannot be practiced unless otherwise provided for by law. However, the practitioner is always free to refuse to perform such an act, but he should inform the person concerned of the condition and month of pregnancy as provided for by law." However, in Section V which deals with practitioners' duties towards patients, the Code states in Article 141: "A therapeutic abortion may be performed if the intervention is the only means to save the life of the mother. When the safety of the mother that is seriously threatened requires a termination of pregnancy or the utilization of a therapeutic intervention that is capable of interrupting the pregnancy, the practitioner must consult at least two other doctors chosen for their competence, who, after review of the case, should jointly make a decision. A copy of the report of the consultation should be given to the patient and a copy kept by each of the two consultants. Also a memorandum of the decision that does not mention the name of the patient must be sent by registered mail to the Council. If there is a therapeutic indication for the termination of pregnancy, the practitioner must yield to any refusal by the patient who is duly informed. This rule does not apply in the case of emergency and when the patient is incapable of giving consent." The Code of Ethics is accessible at: http://www.medecins.ci/documents/Code-Harmonise-CEDEAO.pdf.

Specialist doctor, including OB/GYN

Yes

The CEDEAO/ECOWAS Harmonised Code of Ethics and Practice (2013) (which has no indication of being an official government document) states in Article 21 in Section I (general duties of practitioners): "Voluntary interruption of pregnancy cannot be practiced unless otherwise provided for by law. However, the practitioner is always free to refuse to perform such an act, but he should inform the person concerned of the condition and month of pregnancy as provided for by law." However, in Section V which deals with practitioners' duties towards patients, the Code states in Article 141: "A therapeutic abortion may be performed if the intervention is the only means to save the life of the mother. When the safety of the mother that is seriously threatened requires a termination of pregnancy or the utilization of a therapeutic intervention that is capable of interrupting the pregnancy, the practitioner must consult at least two other doctors chosen for their competence, who, after review of the case, should jointly make a decision. A copy of the report of the consultation should be given to the patient and a copy kept by each of the two consultants. Also a memorandum of the decision that does not mention the name of the patient must be sent by registered mail to the Council. If there is a therapeutic indication for the termination of pregnancy, the practitioner must yield to any refusal by the patient who is duly informed. This rule does not apply in the case of emergency and when the patient is incapable of giving consent." The
Conscientious Objection

Public sector providers

**Not specified**

When there is no explicit reference to an issue covered in the questionnaire in the relevant document(s), this is noted and no interpretation was made.

**Related documents:**
- Law on Sexual and Reproductive Health 2003
- Medicalised Abortion Guidelines and Standards
- Law on the Child 2015

**WHO Guidance**

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

Health-care professionals who claim conscientious objection must refer the woman to another willing and trained provider in the same, or another easily accessible health-care facility. Where referral is not possible, the health-care professional who objects, must provide safe abortion to save the woman's life, to prevent serious injury to her health and provide urgent care when women present with complications.
### Private sector providers

**Not specified**

When there is no explicit reference to an issue covered in the questionnaire in the relevant document(s), this is noted and no interpretation was made.

**Related documents:**
- Law on Sexual and Reproductive Health 2003
- Medicaлизed Abortion Guidelines and Standards
- Law on the Child 2015

**WHO Guidance**

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

Health-care professionals who claim conscientious objection must refer the woman to another willing and trained provider in the same, or another easily accessible health-care facility. Where referral is not possible, the health-care professional who objects, must provide safe abortion to save the woman’s life, to prevent serious injury to her health and provide urgent care when women present with complications from an unsafe or illegal abortion. Safe Abortion Guidelines, § 4.2.2.5.

**Additional notes**

The CEDEAO/ECOWAS Harmonised Code of Ethics and Practice (2013) (which has no indication of being an official government document) states in Article 21 in Section I (general duties of practitioners): “Voluntary interruption of pregnancy cannot be practiced unless otherwise provided for by law. However, the practitioner is always free to refuse to perform such an act, but he should inform the person concerned of the condition and month of pregnancy as provided for by law.” In addition, Article 141 in Section V (practitioners’ duties towards patients) states: “If the practitioner considers that his conviction does not allow him to advise or perform an abortion, he may withdraw while ensuring the continuity of care by a qualified colleague.” The Code of Ethics is accessible at: http://www.medecins.ci/documents/Code-Harmonise-CEDEAO.pdf.

Indicators

Country specific information related to sexual and reproductive health indicators. As data for the Sustainable Development Goal (SDG) indicators related to sexual and reproductive health become available, these will be provided, through periodic updates.

Goal 1. End poverty in all its forms everywhere

1.1.1 Proportion of population below the international poverty line, by sex, age, employment status and geographical location (urban/rural)  
No data

1.3.1 Proportion of population covered by social protection floors/systems, by sex, distinguishing children, unemployed persons, older persons, persons with disabilities, pregnant women, newborns, work-injury victims and the poor and the vulnerable  
No data

1.a.2 Proportion of total government spending on essential services (education, health and social protection)  
No data

Goal 3. Ensure healthy lives and promote well-being for all at all ages

3.1.1 Maternal mortality ratio  
397 (2017)

3.1.2 Proportion of births attended by skilled health personnel  
No data
3.7.1 Proportion of women of reproductive age (aged 15-49 years) who have their need for family planning satisfied with modern methods

No data

3.7.2 Adolescent birth rate (aged 10-14 years; aged 15-19 years) per 1,000 women in that age group

86.1 (2015-2020)

3.8.2 Number of people covered by health insurance or a public health system per 1,000 population

No data

3.c.1 Health worker density and distribution

No data

Goal 4. Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

4.1.1 Proportion of children and young people: (a) in grades 2/3; (b) at the end of primary; and (c) at the end of lower secondary achieving at least a minimum proficiency level in (i) reading and (ii) mathematics, by sex

No data

Goal 5. Achieve gender equality and empower all women and girls

5.1.1 Whether or not legal frameworks are in place to promote, enforce and monitor equality and nondiscrimination on the basis of sex

No data

5.2.1 Proportion of ever-partnered women and girls aged 15 years and older subjected to physical, sexual or psychological violence by a current or former intimate partner in the previous 12 months, by form of violence and by age

No data

5.2.2 Proportion of women and girls aged 15 years and older subjected to sexual violence by persons other than an intimate partner in the previous 12 months, by age and place of occurrence

No data

5.3.1 Proportion of women aged 20-24 years who were married or in a union before age 15 and before age 18

No data

5.3.2 Proportion of girls and women aged 15-49 years who have undergone female genital mutilation/cutting, by age

No data

5.6.1 Proportion of women aged 15-49 years who make their own informed decisions regarding sexual relations, contraceptive use and reproductive health care

No data

5.6.2 Number of countries with laws and regulations that guarantee women aged 15-49 years access to sexual and reproductive health care, information and education

No data

5.a.1 (a) Proportion of total agricultural population with ownership or secure rights over agricultural land, by sex; and (b) share of women among owners or rights-bearers of agricultural land, by type of tenure

No data

5.b.1 Proportion of individuals who own a mobile telephone, by sex

No data

Goal 8. Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

8.5.2 Unemployment rate, by sex, age and persons with disabilities

No data
Goal 10. Reduce inequality within and among countries

10.2.1 Proportion of people living below 50 per cent of median income, by age, sex and persons with disabilities
No data

10.3.1 Proportion of the population reporting having personally felt discriminated against or harassed within the previous 12 months on the basis of a ground of discrimination prohibited under international human rights law
No data

Goal 16. Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels

16.1.3 Proportion of population subjected to physical, psychological or sexual violence in the previous 12 months
No data

16.2.2 Number of victims of human trafficking per 100,000 population, by sex, age and form of exploitation
No data

16.2.3 Proportion of young women and men aged 18-29 years who experienced sexual violence by age 18
No data

16.3.1 Proportion of victims of violence in the previous 12 months who reported their victimization to competent authorities or other officially recognized conflict resolution mechanisms
No data

16.5.1 Proportion of persons who had at least one contact with a public official and who paid a bribe to a public official, or were asked for a bribe by those public officials, during the previous 12 months
No data

16.6.1 Primary government expenditures as a proportion of original approved budget, by sector (or by budget codes or similar)
No data

16.6.2 Proportion of the population satisfied with their last experience of public services
No data

16.7.1 Proportions of positions (by sex, age, persons with disabilities and population groups) in public institutions (national and local legislatures, public service, and judiciary) compared to national distributions
No data

16.9.1 Proportion of children under 5 years of age whose births have been registered with a civil authority, by age
No data

16.10.1 Number of verified cases of killing, kidnapping, enforced disappearance, arbitrary detention and torture of journalists, associated media personnel, trade unionists and human rights advocates in the previous 12 months
No data

16.b.1 Proportion of population reporting having personally felt discriminated against or harassed in the previous 12 months on the basis of a ground of discrimination prohibited under international human rights law
No data

Goal 17. Strengthen the means of implementation and revitalize the Global Partnership for Sustainable Development

17.8.1 Proportion of individuals using the Internet
No data
