**Gestational limit**

Weeks: 24

In case the foetus is not viable, abortion may take place at any point in gestation.

- Penal Code 2013 (page 21)
- Ministerial Decree on abortion, 2017 (page 1111)

**WHO Guidance**

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

A woman is entitled to know the status of her pregnancy and to act on this information; health protection or social reasons can be interpreted to include distress of the pregnant woman caused by the diagnosis of fetal impairment. Prenatal tests and other medical diagnostic services cannot legally be refused because the woman may decide to terminate her pregnancy. Safe Abortion Guidelines, § 4.2.1.4.

Source document: WHO Safe Abortion Guidance (page 103)

Laws or policies that impose time limits on the length of pregnancy may have negative consequences for women, including forcing them to seek clandestine abortions and suffer social inequities. Safe Abortion Guidelines, § 4.2.1.7.

Source document: WHO Safe Abortion Guidance (page 103)

**Additional notes**

In case the foetus is not viable, abortion may take place at any point in gestation.

WHO Guidance

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

The fulfillment of human rights requires that women can access safe abortion when it is indicated to protect their health. WHO defines health for member states as a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity. Safe Abortion Guidelines, § 4.2.1.2.

Source document: WHO Safe Abortion Guidance (page 102)

Life

Yes

Related documents:
- Penal Code 2013 (page 21)

Gestational limit

Weeks: No limit specified

The 2018 Ministerial Decree on abortion defines abortion as the termination of pregnancy until 28 weeks of pregnancy. It also stipulates that the committee of the health unit should examine cases not stipulated in the law on a case-by-case basis to ensure that the pregnant woman's access and sexual and reproductive rights is guaranteed.

- Penal Code 2013 (page 21)
- Ministerial Decree on abortion, 2017 (page 1111)

WHO Guidance

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

The human right to life requires protection by law, including when pregnancy is life-threatening or a pregnant woman's life is otherwise endangered. Both medical and social conditions can constitute life-threatening conditions. Safe Abortion Guidelines, § 4.2.1.1.

Source document: WHO Safe Abortion Guidance (page 102)

Laws or policies that impose time limits on the length of pregnancy may have negative consequences for women, including forcing them to seek clandestine abortions and suffer social inequities. Safe Abortion Guidelines, § 4.2.1.7.

Source document: WHO Safe Abortion Guidance (page 103)

Additional notes

The 2018 Ministerial Decree on abortion defines abortion as the termination of pregnancy until 28 weeks of pregnancy. It also stipulates that the committee of the health unit should examine cases not stipulated in the law on a case-by-case basis to ensure that the pregnant woman's access and sexual and reproductive rights is guaranteed.

Related documents:
- Ministerial Decree on abortion, 2017 (page 1111)

Additional notes

The gestational limit in case of sexual violence, failure of a modern contraceptive method, when the woman is infected with HIV/AIDS and when the pregnancy is not wanted by a minor who is biologically, socially or psychologically unprepared is 12 weeks. The committee of the health unit should examine cases not stipulated in the law on a case-by-case basis to ensure that the pregnant woman's access and sexual and reproductive rights is guaranteed.
## Additional Requirements to Access Safe Abortion

</tbody>
</table>

### Number and cadre of health-care professional authorizations required

The Penal Code states that two health professionals different from the one by whom or under whose direction the abortion will be undertaken must verify the circumstances that make the abortion not punishable in a medical certificate, written and signed before the intervention. By contrast, the 2018 Ministerial Decree on abortion states that the circumstances must be certified by a doctor or health professional qualified for this purpose.

- Penal Code 2013 (page 21)
- Ministerial Decree on abortion, 2017 (page 1111)

### WHO Guidance

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

Third-party authorization should not be required for women to obtain abortion services. The requirement for authorization by hospital authorities may violate the right to privacy and women’s access to health care on the basis of equality of men and women. Safe Abortion Guidelines, § 4.2.2.2.

### WHO Guidance

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

Laws, policies and practices that restrict access to abortion information and services can deter women from care seeking and create a “chilling effect” (suppression of actions because of fear of reprisals or penalties) for the provision of safe, legal services. Examples of barriers include: requiring third-party authorization from one or more medical professionals or a hospital committee, court or police, parent or guardian or a woman’s partner or spouse. Safe Abortion Guidelines, § 4.2.2

#### Police report required in case of rape

No

**Related documents:**
- Ministerial Decree on abortion, 2017 (page 1111)

#### Parental consent required for minors

Yes

**Related documents:**
- Penal Code 2013 (page 21)
- Ministerial Decree on abortion, 2017 (page 1111)

#### Can another adult consent in place of a parent?

Yes

**Related documents:**
- Penal Code 2013 (page 21)
- Ministerial Decree on abortion, 2017 (page 1111)

#### Age where consent not needed

16

**Related documents:**
- Penal Code 2013 (page 21)

### WHO Guidance

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

Third-party authorization should not be required for women to obtain abortion services. The requirement for authorization by parents may violate the right to privacy and women’s access to health care on the basis of equality of men and women. Safe Abortion Guidelines, § 4.2.2.2.

**Source document:** WHO Safe Abortion Guidance (page 105)

#### Additional notes

According to the Penal Code, consent by a legal representative is not needed in case of an emergency but in such cases, whenever possible, the physician should seek the advice of one or more additional physicians. The 2018 Ministerial Decree on abortion stipulates that consent may be provided alternatively by the legal representative, or another person who is recognized as having legal custody of the pregnant woman, when the natural or legal guardian cannot be found or refuses to give his consent or even by another adult person without legal responsibility but acting as a confidant.

#### Spousal consent

**Not specified**

When there is no explicit reference to an issue covered in the questionnaire in the relevant document(s), this is noted and no interpretation was made.

- Clinical guidelines on abortion and post abortion care, 2017

### WHO Guidance

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

In situations where abortion is restricted for sex selection purposes, terminating a pregnancy for this reason is likely to involve an unsafe procedure carrying high risks. Any policies or guidelines on the use of technology in obstetric and fetal medicine should take into account the need to ensure women's access to safe abortion and other services - efforts to manage or limit sex selection should also not hamper or limit access to safe abortion services. Preventing gender-biased sex selection: an interagency statement, p 10 - Recommendation.

**WHO Guidance**

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

Abortion facilities within both the public and private sectors should be available at all levels of the health system, with appropriate referral mechanisms between facilities. Safe Abortion Guidelines, § 3.3.1.

*Source document: WHO Safe Abortion Guidance (page 75)*
The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

Health-care professionals who claim conscientious objection must refer the woman to another willing and trained provider in the same, or another easily accessible health-care facility. Where referral is not possible, the health-care professional who objects, must provide safe abortion to save the woman's life, to prevent serious injury to her health and provide urgent care when women present with complications from an unsafe or illegal abortion. Safe Abortion Guidelines, § 4.2.2.5.

Source document: WHO Safe Abortion Guidance (page 106)

Additional notes

The right to conscientious objection may be exercised by any physician or health professional qualified to provide pregnancy termination services. There is no right to conscientious objection in cases where abortion is necessary to prevent the risk of death of the pregnant woman, to save the woman's life or prevent serious risks or damage to her health. It is the responsibility of the direction of the Sanitary Unit to indicate another doctor or health professional of Health to carry out the interruption of the pregnancy. If no other doctor or health professional is available, the patient must be transferred to another health unit, following the existing referral procedures. If the conscientious objector is a person responsible for authorizing the medical act of voluntary termination of pregnancy, he or she must be permanently replaced by another doctor or health professional qualified and designated as a substitute for this purpose.

Private sector providers

No

Additional notes

The right to conscientious objection may be exercised by any physician or health professional qualified to provide pregnancy termination services. There is no right to conscientious objection in cases where abortion is necessary to prevent the risk of death of the pregnant woman, to save the woman's life or prevent serious risks or damage to her health. It is the responsibility of the direction of the Sanitary Unit to indicate another doctor or health professional of Health to carry out the interruption of the pregnancy. If no other doctor or health professional is available, the patient must be transferred to another health unit, following the existing referral procedures. If the conscientious objector is a person responsible for authorizing the medical act of voluntary termination of pregnancy, he or she must be permanently replaced by another doctor or health professional qualified and designated as a substitute for this purpose.

Provider type not specified

Yes

Related documents:
