**Gestational limit**

Weeks: No limit specified

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Grounds-based approaches to restricting access to abortion should be revised in favour of making abortion available on the request of the woman, girl or other pregnant person. The Abortion Care Guideline recommends against laws and other regulations that restrict abortion by grounds. The guideline recommends abortion be available on the request of the woman, girl or other pregnant person.

Until they are replaced with abortion on request, any existing grounds should be formulated and applied in a manner consistent with international human rights law. This requires that abortion is available when carrying a pregnancy to term would cause the woman, girl or other pregnant person substantial pain or suffering, including but not limited to situations where the pregnancy is the result of rape or incest. Abortion Care Guideline § 2.2.2.

- **Source document:** WHO Abortion Care Guideline (page 64)

Laws or policies that impose time limits on the length of pregnancy may have negative consequences for women, including forcing them to seek clandestine abortions and suffer social inequities. Safe Abortion Guidelines, § 4.2.1.7.

- **Source document:** WHO-Safe-Abortion-Guidance-2012.pdf#page=103

**Rape**

Yes

**Related documents:**
- Law on Abortion, 1997 (page 2)

## Other
Authorization of health professional(s)

Yes

Related documents:
- Law on Abortion, 1997 (page 2)

Number and cadre of health-care professional authorizations required

Two or Three

Doctor (Specialty Not Specified)

Medium medical practitioner

The Law on Abortion states that the decision on whether the conditions for lawful abortion after 12 weeks of gestation are met “requires an approval from a group of 2 to 3 doctors and also a consent from the concerned person. Technical conditions for application of this article shall be determined by a Proclamation of the Ministry of Health.”

- Law on Abortion, 1997 (page 2)
- National Protocol Comprehensive Abortion Care, 2010 (page 2)

WHO Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Third-party authorization requirements are incompatible with international human rights law, which provides that States may not restrict women’s access to health services on the ground that they do not have the authorization of husbands, partners, parents or health authorities, because they are unmarried, or because they are women. The Abortion Care Guideline recommends that abortion be available on the request of the woman, girl or other pregnant person without the authorization of any other individual, body or institution. Abortion Care Guideline § 3.3.2.

Source document: WHO Abortion Care Guideline (page 81)

Additional notes

The Law on Abortion states that the decision on whether the conditions for lawful abortion are met “requires an approval from a group of 2 to 3 doctors and also a consent from the concerned person. Technical conditions for application of this article shall be determined by a Proclamation (Prakas) of the Ministry of Health.”

Related documents:
- National Protocol Comprehensive Abortion Care, 2010 (page 2)

Authorization in specially licensed facilities only

Yes

Related documents:
- Law on Abortion, 1997 (page 2)

WHO Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

To establish an enabling environment, there is a need for abortion care to be integrated into the health system across all levels (including primary, secondary and tertiary) – and supported in the community – to allow for expansion of health worker roles, including self-management approaches. To ensure both access to abortion and achievement of Universal Health Coverage (UHC), abortion must be centred within primary health care (PHC), which itself is fully integrated within the health system, facilitating referral pathways for higher-level care when needed. Abortion Care Guideline § 1.4.1.

Source document: WHO Abortion Care Guideline (page 52)

Additional notes

The facility must be authorized as an abortion facility by the Ministry of Health.

Judicial authorization for minors

Not specified

When there is no explicit reference to an issue covered in the questionnaire in the relevant document(s), this is noted and no interpretation was made.

WHO Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

The Abortion Care Guideline recommends that abortion be available on the request of the woman, girl or other pregnant person without the authorization of any other individual, body or institution. Abortion Care Guideline § 3.3.2.

Source document: WHO Abortion Care Guideline (page 81)

Judicial authorization in cases of rape

Not specified

When there is no explicit reference to an issue covered in the questionnaire in the relevant document(s), this is noted and no interpretation was made.

WHO Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

There shall be no procedural requirements to “prove” or “establish” satisfaction of grounds, such as requiring judicial orders or police reports in cases of rape or sexual assault (for sources to support this information). These restrictions subject the individual to unnecessary trauma, may put them at increased risk from the perpetrator, and may cause women to resort to unsafe abortion.

The Abortion Care Guideline recommends abortion be available on the request of the woman, girl or other pregnant person. Abortion Care Guideline § 2.2.2.

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

While counselling should be made available and accessible, it should always be voluntary for women to choose whether or not they want to receive it. The right to refuse counselling when offered must be respected. Where provided, counselling must be available to individuals in a way that respects privacy and confidentiality.

Counselling should be person-centred and may need to be tailored according to the needs of the individual; young people, survivors of sexual and gender-based violence or members of marginalized groups may have different information or counselling requirements.

The content and approach to counselling will need to be adjusted depending on the reason for seeking abortion services. Therefore, it is important for the counsellor to be aware of and sensitive to the individual’s situation and needs. Abortion Care Guideline § 3.2.2.

Mandatory waiting periods delay access to abortion, sometimes to the extent that women’s access to abortion or choice of abortion method is restricted. The Abortion Care Guideline recommends against mandatory waiting periods for abortion. Abortion Care Guideline § 3.3.1.

Regulatory, policy and programmatic barriers – as well as barriers in practice – that hinder access to and timely provision of quality abortion care should be removed. Abortion Care Guideline § Box 2.1.

In situations where abortion is restricted for sex selection purposes, terminating a pregnancy for this reason is likely to involve an unsafe procedure carrying high risks. Any policies or guidelines on the use of technology in obstetric and fetal medicine should take into account the need to ensure women’s access to safe abortion and other services - efforts to manage or limit sex selection should also not hamper or limit access to safe abortion services. Preventing gender-biased sex selection: an interagency statement.
### Clinical and Service-delivery Aspects of Abortion Care

#### National guidelines for induced abortion

Yes, guidelines issued by the government

**Related documents:**
- National Protocol Comprehensive Abortion Care, 2010 (page i)

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

National standards and guidelines for abortion care should be evidence based and periodically updated and should provide the necessary guidance to achieve equal access to comprehensive abortion care. Leadership should also promote evidence-based SRH services according to these standards and guidelines. Abortion Care Guideline § 1.3.3.

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Mifepristone and misoprostol should be listed in relevant national EMLs (NEMLs) or their equivalent and should be included in the relevant clinical care/service delivery guidelines.

Inclusion in the NEML is one important component of ensuring that quality medicines are available.

For induced abortion, mifepristone (200 mg) and misoprostol (200 μg), are recommended in the WHO EML. The EML specifically mentions the following co-packaged formulation: 1 tablet mifepristone (200 mg) + 4 tablets misoprostol (200 μg).

Restrictions on prescribing authority for some categories of health workers may need to be modified or other mechanisms put in place to make the medicines available for these health workers within the regulatory framework of the health system. Abortion Care Guideline § 1.4.4.

### WHO Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Where it is lawful, abortion must be accessible in practice. This requires both ensuring that health-care facilities, commodities and services are accessible (including sufficient providers), and that law and policy on abortion is formulated, interpreted and applied in a way that is compatible with human rights. Abortion Care Guideline § 1.3.1.

Source document: WHO Abortion Care Guideline (page 48)

National standards and guidelines for abortion care should be evidence based and periodically updated and should provide the necessary guidance to achieve equal access to comprehensive abortion care. Leadership should also promote evidence-based SRH services according to these standards and guidelines. Abortion Care Guideline § 1.3.3.

**WHO Guidance**

Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

The Abortion Care Guideline recommends the option of telemedicine as an alternative to in-person interactions with the health worker to deliver medical abortion services in whole or in part. Telemedicine services should include referrals (based on the woman's location) for medicines (abortion and pain control medicines), any abortion care or post-abortion follow-up required (including for emergency care if needed), and for post-abortion contraceptive services. Abortion Care Guideline § 3.6.1.

**Contraception included in post-abortion care** | Yes |

**Related documents:**
- National Protocol Comprehensive Abortion Care, 2010 (page 8)
- National Safe Motherhood Protocol, 2020 (page 222: English)
- National Safe Motherhood Protocol, 2020 (page 1: Khmer)

**WHO Guidance**

All contraceptive options may be considered after an abortion. For individuals undergoing surgical abortion and wishing to use contraception, Abortion Care Guideline recommends the option of initiating the contraception at the time of surgical abortion. For individuals undergoing medical abortion, for those who choose to use hormonal contraception, the Abortion Care Guideline suggests that they be given the option of starting hormonal contraception immediately after the first pill of the medical abortion regimen. For those who choose to have an IUD inserted, Abortion Care Guideline suggests IUD placement at the time that success of the abortion procedure is determined. Abortion Care Guideline § 3.5.4.

**Insurance to offset end user costs** | No data found |

**Other (if applicable)** | 

**WHO Guidance**

Where user fees are charged for abortion, this should be based on careful consideration of ability to pay, and fee waivers should be available for those who are facing financial hardship and adolescent abortion seekers. As far as possible, abortion services and supplies should be mandated for coverage under insurance plans as inability to pay is not an acceptable reason to deny or delay abortion care. Furthermore, having transparent procedures in all health-care facilities can ensure that informal charges are not imposed by staff. Abortion Care Guideline § 1.4.2.

Doctors or medical assistants or secondary midwives can carry out an abortion only if they have received proper training with a training certificate from the Ministry of Health and only with the authorization of the Ministry of Health.

The training must be conducted according to the Clinical Protocol of the Ministry of Health with its focus on:

- Techniques of abortion
- Emergency treatment of various complications
- Examination of the concerned person’s health status to identify her strength to cope with the abortion
- Counseling for the concerned person

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

The Abortion Care Guideline recommends against regulation on who can provide and manage abortion that is inconsistent with WHO guidance. Abortion Care Guideline § 3.3.8.

- **WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

The Abortion Care Guideline recommends that access to and continuity of comprehensive abortion care be protected against barriers created by conscientious objection. It is critical that States ensure compliance with regulations and design/organize health systems to ensure access to and continuity of quality abortion care. If it proves impossible to regulate conscientious objection in a way that respects, protects and fulfils abortion seekers’ rights, conscientious objection in abortion provision may become indefensible.

Indicators

Country specific information related to sexual and reproductive health indicators. As data for the Sustainable Development Goal (SDG) indicators related to sexual and reproductive health become available, these will be provided, through periodic updates.

Goal 1. End poverty in all its forms everywhere

1.1.1 Proportion of population below the international poverty line, by sex, age, employment status and geographical location (urban/rural)

1.1.1.1 Proportion of population below the international poverty line, by sex, age, employment status and geographical location (urban/rural)

1.3.1 Proportion of population covered by social protection floors/systems, by sex, distinguishing children, unemployed persons, older persons, persons with disabilities, pregnant women, newborns, work-injury victims and the poor and the vulnerable

1.3.1.1 Proportion of population covered by social protection floors/systems, by sex, distinguishing children, unemployed persons, older persons, persons with disabilities, pregnant women, newborns, work-injury victims and the poor and the vulnerable

1.a.2 Proportion of total government spending on essential services (education, health and social protection)

1.a.2.2 Proportion of total government spending on essential services (education, health and social protection)
**Goal 3. Ensure healthy lives and promote well-being for all at all ages**
