**WHO Guidance**

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

A woman is entitled to know the status of her pregnancy and to act on this information; health protection or social reasons can be interpreted to include distress of the pregnant woman caused by the diagnosis of fetal impairment. Prenatal tests and other medical diagnostic services cannot legally be refused because the woman may decide to terminate her pregnancy. Safe Abortion Guidelines, § 4.2.1.4.

Additional Requirements to Access Safe Abortion

**Health**

Yes

**Related documents:**
- Laws pertaining to Practice of Health Professions, 2005 (page 16)

**Gestational limit**

Weeks: 4 months

- Laws pertaining to Practice of Health Professions, 2005 (page 16)

**WHO Guidance**

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

The fulfillment of human rights requires that women can access safe abortion when it is indicated to protect their health. WHO defines health for member states as a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity. Safe Abortion Guidelines, § 4.2.1.2.

Source document: WHO Safe Abortion Guidance (page 102)

Laws or policies that impose time limits on the length of pregnancy may have negative consequences for women, including forcing them to seek clandestine abortions and suffer social inequities. Safe Abortion Guidelines, § 4.2.1.7.

Source document: WHO Safe Abortion Guidance (page 103)

**Life**

Yes

**Related documents:**
- Laws pertaining to Practice of Health Professions, 2005 (page 16)

**Gestational limit**

Weeks: No limit specified

After 4 months of gestation, abortion is not permitted unless it is believed that the survival of the fetus in the mother's womb will cause her to die and then only conducted after exhausting all means to save its life.

- Laws pertaining to Practice of Health Professions, 2005 (page 16)

**WHO Guidance**

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

The human right to life requires protection by law, including when pregnancy is life-threatening or a pregnant woman's life is otherwise endangered. Both medical and social conditions can constitute life-threatening conditions. Safe Abortion Guidelines, § 4.2.1.1.

Source document: WHO Safe Abortion Guidance (page 102)

Laws or policies that impose time limits on the length of pregnancy may have negative consequences for women, including forcing them to seek clandestine abortions and suffer social inequities. Safe Abortion Guidelines, § 4.2.1.7.

Source document: WHO Safe Abortion Guidance (page 103)

**Additional notes**

After 4 months of gestation, abortion is not permitted unless it is believed that the survival of the fetus in the mother's womb will cause her to die and then only conducted after exhausting all means to save its life.

**Other**

A legitimate reason that does not include harm of hardship from raising a child or fear of being unable to pay for living expenses or education or the couple's feeling that they already have enough children, The mother may suffer serious anticipated and verified harm if she continues the pregnancy.

**Related documents:**
- Laws pertaining to Practice of Health Professions, 2005 (page 16)

**Additional notes**

Abortion is not permitted unless it is believed that the survival of the fetus in the mother's womb will cause her to die, and then only conducted after exhausting all means to save its life. Abortion for a legitimate interest or due to anticipated and verified harm to the mother may be performed during the first 40 days of pregnancy. Abortion in case of the mother suffering serious anticipated and verified harm if she continues the pregnancy can be undertaken up to 4 months of pregnancy.

### Number and cadre of health-care professional authorizations required

3

- Specialist Doctor, Including OB/GYN

For abortions under 4 months of gestation where there is a risk to health or likelihood of harm to the mother, eligibility must be determined by a medical committee composed of at least three doctors, consultants or specialists, including a consultant or specialist in the disease/illness which is the cause for the termination of pregnancy.

- Laws pertaining to Practice of Health Professions, 2005

### Authorization in specially licensed facilities only

- WHO Guidance

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

Third-party authorization should not be required for women to obtain abortion services. The requirement for authorization by hospital authorities may violate the right to privacy and women's access to health care on the basis of equality of men and women. Safe Abortion Guidelines, § 4.2.2.2.

- Related documents:  
  - Laws pertaining to Practice of Health Professions, 2005

### Judicial authorization for minors

- WHO Guidance

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

Third-party authorization should not be required for women to obtain abortion services. Safe Abortion Guidelines, § 4.2.2.

- Related documents:  
  - Laws pertaining to Practice of Health Professions, 2005

### Judicial authorization in cases of rape

- WHO Guidance

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

Laws, policies and practices that restrict access to abortion information and services can deter women from care seeking and create a "chilling effect" (suppression of actions because of fear of reprisals or penalties) for the provision of safe, legal services. Examples of barriers include: requiring third-party authorization from one or more medical professionals or a hospital committee, court or police, parent or guardian or a woman's partner or spouse. Safe Abortion Guidelines, § 4.2.2

- Related documents:  
  - Laws pertaining to Practice of Health Professions, 2005

### Police report required in case of rape

---

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

**States should consider eliminating waiting periods that are not medically required, and expanding services to serve all eligible women promptly.** Safe Abortion Guidelines, § 4.2.2.6. 

**Requirements for HIV and other tests that are not clinically indicated are potential service-delivery barriers.** Safe Abortion Guidelines, p 88.

**In situations where abortion is restricted for sex selection purposes, terminating a pregnancy for this reason is likely to involve an unsafe procedure carrying high risks.** Any policies or guidelines on the use of technology in obstetric and fetal medicine should take into account the need to ensure women’s access to safe abortion and other services - efforts to manage or limit sex selection should also not hamper or limit access to safe abortion services. Preventing gender-biased sex selection: an interagency statement, p 10 - Recommendation.
Clinical and Service-delivery Aspects of Abortion Care

### National guidelines for induced abortion

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

Standards and guidelines should be developed and updated with the intent of eliminating barriers to obtaining the highest attainable standard of sexual and reproductive health. Safe Abortion Guidelines, § 3.3. Standards and guidelines should cover: types of abortion service, where and by whom they can be provided; essential equipment, instruments, medications, supplies and facility capabilities; referral mechanisms; respect for women’s informed decision-making, autonomy, confidentiality and privacy. Safe Abortion Guidelines, p. 63.

**WHO Guidance**

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

Vacuum aspiration is the recommended technique of surgical abortion for pregnancies of up to 12 to 14 weeks of gestation. The procedure should not be routinely completed by dilatation and sharp curettage (D&C). Safe Abortion Guidelines, Executive Summary, Box 1- Recommendation.

**Source document:** WHO Safe Abortion Guidance (page 123)

Dilatation and evacuation (D&E) and medical methods (mifepristone and misoprostol; misoprostol alone) are both recommended methods for abortion for gestations over 12 to 14 weeks. Safe Abortion Guidelines, Executive Summary, Box 3- Recommendation.

**Source document:** WHO Safe Abortion Guidance (page 123)

The recommended method for medical abortion is mifepristone followed by misoprostol (regimen differs by gestational age). Safe Abortion Guidelines, Executive Summary, Box 2- Recommendation.

**Source document:** WHO Safe Abortion Guidance (page 13)

Where mifepristone is not available, the recommended method for medical abortion is misoprostol (regimen differs by gestational age). Safe Abortion Guidelines, Executive Summary, Box 2- Recommendation.

**Source document:** WHO Safe Abortion Guidance (page 14)

### WHO Guidance

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

The facilities and skills required to manage most abortion complications are similar to those needed to care for women who have had a spontaneous abortion (miscarriage). Safe Abortion Guidelines § 2.2.6.

Source document: WHO Safe Abortion Guidance (page 57)

All women should receive contraceptive information and be offered counselling for and methods of post-abortion contraception, including emergency contraception, before leaving the health-care facility. Safe Abortion Guidelines, § 2.3.

Source document: WHO Safe Abortion Guidance (page 62)

Financing of abortion services should take into account costs to the health system while ensuring that services are affordable and readily available to all women who need them. Safe Abortion Guidelines, Executive Summary, Box 6 - Recommendation. Abortion services should be mandated for coverage under insurance plans; women should never be denied or delayed because of the inability to pay. Safe Abortion Guidelines, § 3.6.2.

Source document: WHO Safe Abortion Guidance (page 18)

Subject to gestational age and method, abortion care can be safely provided by any properly trained health-care provider, including specialist doctors, non-specialist doctors; associate and advanced associate clinicians; midwives; and nurses. Health Worker Roles in Safe Abortion Care, p 33- Recommendation.

Indicators

Country specific information related to sexual and reproductive health indications. As data for the Sustainable Development Goal (SDG) indicators related to sexual and reproductive health become available, these will be provided, through periodic updates.

Goal 1. End poverty in all its forms everywhere

1.1.1 Proportion of population below the international poverty line, by sex, age, employment status and geographical location (urban/rural)  
No data

Goal 3. Ensure healthy lives and promote well-being for all at all ages

3.1.1 Maternal mortality ratio  
17 (2017)

3.1.2 Proportion of births attended by skilled health personnel  
No data

3.7.1 Proportion of women of reproductive age (aged 15-49 years) who have their need for family planning satisfied with modern methods  
No data

3.7.2 Adolescent birth rate (aged 10-14 years; aged 15-19 years) per 1,000 women in that age group  
7.8 (2015-2020)

3.8.2 Number of people covered by health insurance or a public health system per 1,000 population  
No data
3.c.1 Health worker density and distribution

Goal 4. Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

4.1.1 Proportion of children and young people: (a) in grades 2/3; (b) at the end of primary; and (c) at the end of lower secondary achieving at least a minimum proficiency level in (i) reading and (ii) mathematics, by sex

Goal 5. Achieve gender equality and empower all women and girls

5.1.1 Whether or not legal frameworks are in place to promote, enforce and monitor equality and nondiscrimination on the basis of sex

5.2.1 Proportion of ever-partnered women and girls aged 15 years and older subjected to physical, sexual or psychological violence by a current or former intimate partner in the previous 12 months, by form of violence and by age

5.2.2 Proportion of women and girls aged 15 years and older subjected to sexual violence by persons other than an intimate partner in the previous 12 months, by age and place of occurrence

5.3.1 Proportion of women aged 20-24 years who were married or in a union before age 15 and before age 18

5.3.2 Proportion of girls and women aged 15-49 years who have undergone female genital mutilation/cutting, by age

5.6.1 Proportion of women aged 15-49 years who make their own informed decisions regarding sexual relations, contraceptive use and reproductive health care

5.6.2 Number of countries with laws and regulations that guarantee women aged 15-49 years access to sexual and reproductive health care, information and education

5.a.1 (a) Proportion of total agricultural population with ownership or secure rights over agricultural land, by sex; and (b) share of women among owners or rights-bearers of agricultural land, by type of tenure

5.b.1 Proportion of individuals who own a mobile telephone, by sex

Goal 8. Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

8.5.2 Unemployment rate, by sex, age and persons with disabilities

Goal 10. Reduce inequality within and among countries

10.2.1 Proportion of people living below 50 per cent of median income, by age, sex and persons with disabilities

10.3.1 Proportion of the population reporting having personally felt discriminated against or harassed within the previous 12 months on the basis of a ground of discrimination prohibited under international human rights law

Goal 16. Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels

16.1.3 Proportion of population subjected to physical, psychological or sexual violence in the previous 12 months
