### WHO Guidance

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

A woman is entitled to know the status of her pregnancy and to act on this information; health protection or social reasons can be interpreted to include distress of the pregnant woman caused by the diagnosis of fetal impairment. Prenatal tests and other medical diagnostic services cannot legally be refused because the woman may decide to terminate her pregnancy. Safe Abortion Guidelines, § 4.2.1.4.

**Source document**: WHO Safe Abortion Guidance (page 103)

### Additional notes

In the case of severe stress due to the finding that the fetus has, or has a high risk of having, severe disability, or has or has a high risk of having severe genetic disease, after the said woman has been examined and received genetic counseling and the aforementioned matters have been acknowledged in writing by at least one medical practitioner other than the one who will perform the medical termination of pregnancy, the pregnant women shall be regarded as having mental health problem. For this purpose there shall be clear medical indications that the pregnant woman has physical health or mental health problem and the examination and diagnosis shall be recorded in the medical record and kept as evidence.

### Gestational limit

**Weeks**: 12 weeks if performed in clinics, no limit in hospital

The limit of 12 weeks gestational period applies to clinics outside hospitals. There is no gestational limit set for abortions done in hospitals. Therefore, the gestational limit is specific to the site where the abortion is conducted.

Termination of pregnancy pursuant to Criminal Code Articles 305(1) and (2) must be performed in the following medical premises:

1. A government hospital or government agency that provides overnight admission service to patients, or a medical infirmary that has beds for patients for overnight stay in accordance with the Medical Premise Act, these medical premises are allowed to perform appropriate therapeutic termination of pregnancy.

2. A medical clinic in accordance with the Medical Premise Act, is allowed to perform therapeutic termination of pregnancy where the gestational age is not over twelve weeks.

**Related documents:**
- Medical Council Regulations (page 1)
- Medical Council Regulations (page 2)

### WHO Guidance

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

The protection of women from cruel, inhuman and degrading treatment requires that those who have become pregnant as the result of coerced or forced sexual acts can lawfully access safe abortion services. Prompt, safe abortion services should be provided on the basis of a woman's complaint rather than requiring forensic evidence or police examination. Safe Abortion Guidelines, § 4.2.1.3.

**WHO Guidance**

The following descriptions and recommendations were extracted from WHO guidance on safe abortion.

Vacuum aspiration is the recommended technique of surgical abortion for pregnancies of up to 12 to 14 weeks of gestation. The procedure should not be routinely completed by dilatation and sharp curettage (D&C). Safe Abortion Guidelines, Executive Summary, Box 1-Recommendation.
Dilatation and evacuation (D&E) and medical methods (mifepristone and misoprostol; misoprostol alone) are both recommended methods for abortion for gestations over 12 to 14 weeks. Safe Abortion Guidelines, Executive Summary, Box 3- Recommendation.

The recommended method for medical abortion is mifepristone followed by misoprostol (regimen differs by gestational age). Safe Abortion Guidelines, Executive Summary, Box 2- Recommendation.

Where mifepristone is not available, the recommended method for medical abortion is misoprostol (regimen differs by gestational age). Safe Abortion Guidelines, Executive Summary, Box 2- Recommendation.

The combination of mifepristone and misoprostol for medical abortion is included on the WHO model list of essential medicines. Safe Abortion Guidelines, § 2.2.5

Chemists/pharmacists can help women avoid unintended pregnancy through provision of accurate contraceptive information, pregnancy tests, contraceptive methods and referral to safe abortion services. Safe Abortion Guidelines, § 3.3.1.1.

Medabon is registered in Thailand but it was not possible to determine the details of the registration due to language limitations. Mifepristone and/or combination mifepristone-misoprostol are not contained in the Thailand Essential Drug List 2012. A more recent Essential Drug List exists but could not be located.

Misoprostol is not contained in the Thailand Essential Drug List 2012. A more recent Essential Drug List exists but could not be located.

The limit of 12 weeks gestational period applies to clinics outside hospitals. There is no gestational limit set for abortions done in hospitals. Therefore, the gestational limit is specific to the site where the abortion is conducted.
Termination of pregnancy pursuant to Criminal Code Articles 305(1) and (2) must be performed in the following medical premises:

1.
