### Gestational limit

**Weeks:** 20

- Thailand Penal Code Amendment, 2021 (page 2)

### WHO Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Grounds-based approaches to restricting access to abortion should be revised in favour of making abortion available on the request of the woman, girl or other pregnant person. The Abortion Care Guideline recommends against laws and other regulations that restrict abortion by grounds. The guideline recommends abortion be available on the request of the woman, girl or other pregnant person.

Until they are replaced with abortion on request, any existing grounds should be formulated and applied in a manner consistent with international human rights law. This requires that abortion is available when carrying a pregnancy to term would cause the woman, girl or other pregnant person substantial pain or suffering, including but not limited to situations where the pregnancy is not viable. Grounds-based approaches that require fetal impairments to be fatal for abortion to be lawful frustrate providers and leave women no choice but to continue with pregnancy. Being required to continue with a pregnancy that causes significant distress violates numerous human rights. Abortion Care Guideline § 2.2.2.

Source document: WHO Abortion Care Guideline (page 64)

Laws or policies that impose time limits on the length of pregnancy may have negative consequences for women, including forcing them to seek clandestine abortions and suffer social inequities. Safe Abortion Guidelines, § 4.2.1.7.

Source document: WHO Abortion Care Guideline (page 103)

## Rape

| Yes |

### Related documents:

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Third-party authorization requirements are incompatible with international human rights law, which provides that States may not restrict women’s access to health services on the ground that they do not have the authorization of husbands, partners, parents or health authorities, because they are unmarried, or because they are women. The Abortion Care Guideline recommends that abortion be available on the request of the woman, girl or other pregnant person without the authorization of any other individual, body or institution. Abortion Care Guideline § 3.3.2.

**Additional notes**

When a woman’s pregnancy is over 12 weeks but less than 20 weeks, she needs to be examined by a counselor and issued a document, confirming that she has been examined and has received a consultation on alternatives to pregnancy, to proceed with the termination of pregnancy. The counselor takes action to coordinate with relevant agencies for women to proceed with termination of pregnancy.

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

To establish an enabling environment, there is a need for abortion care to be integrated into the health system across all levels (including primary, secondary and tertiary) – and supported in the community – to allow for expansion of health worker roles, including self-management approaches. To ensure both access to abortion and achievement of Universal Health Coverage (UHC), abortion must be centred within primary health care (PHC), which itself is fully integrated within the health system, facilitating referral pathways for higher-level care when needed. Abortion Care Guideline § 1.4.1.

**Additional notes**

When a woman’s pregnancy is over 12 weeks but less than 20 weeks, she needs to be examined by a counselor and issued a document, confirming that she has been examined and has received a consultation on alternatives to pregnancy, to proceed with the termination of pregnancy. The counselor takes action to coordinate with relevant agencies for women to proceed with termination of pregnancy.
The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

The Abortion Care Guideline recommends abortion be available on the request of the woman, girl or other pregnant person without the authorization of any other individual, body or institution. Abortion Care Guideline § 3.3.2.

Source document: WHO Abortion Care Guideline (page 81)

There shall be no procedural requirements to “prove” or “establish” satisfaction of grounds, such as requiring judicial orders or police reports in cases of rape or sexual assault (for sources to support this information). These restrictions subject the individual to unnecessary trauma, may put them at increased risk from the perpetrator, and may cause women to resort to unsafe abortion.

The Abortion Care Guideline recommends abortion be available on the request of the woman, girl or other pregnant person. Abortion Care Guideline § 2.2.2.

WHO Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

While parental or partner involvement in abortion decision-making can support and assist women, girls or other pregnant persons, this must be based on the values and preferences of the person availing of abortion and not imposed by third-party authorization requirements. Third-party authorization requirements are incompatible with international human rights law, which provides that States may not restrict women’s access to health services on the ground that they do not have the authorization of husbands, partners, parents or health authorities, because they are unmarried, or because they are women. The Abortion Care Guideline recommends that abortion be available on the request of the woman, girl or other pregnant person without the authorization of any other individual, body or institution. Abortion Care Guideline § 3.3.2.

Ultrasound images or listen to foetal heartbeat required

When there is no explicit reference to an issue covered in the questionnaire in the relevant document(s), this is noted and no interpretation was made.

Related documents:
- Clinical Practice Handbook for Safe Abortion Care, 2015
- Declaration of Patients’ Rights
- Thailand Penal Code Amendment, 2021
- Decree on Examination and Consultation on Alternatives to Pregnancy, 2022

WHO Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

The right to refuse information, including the right to refuse viewing ultrasound images, must be respected. The Abortion Care Guideline recommends against the use of ultrasound scanning as a prerequisite for providing abortion services for both medical and surgical abortion. Abortion Care Guideline § 3.3.5.

Source document: WHO Abortion Care Guideline (page 85)
### Compulsory counselling

**Related documents:**
- Decree on Examination and Consultation on Alternatives to Pregnancy, 2022 (page 1)

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

While counselling should be made available and accessible, it should always be voluntary for women to choose whether or not they want to receive it. The right to refuse counselling when offered must be respected. Where provided, counselling must be available to individuals in a way that respects privacy and confidentiality.

Counselling should be person-centred and may need to be tailored according to the needs of the individual; young people, survivors of sexual and gender-based violence or members of marginalized groups may have different information or counselling requirements.

The content of and approach to counselling will need to be adjusted depending on the reason for seeking abortion services. Therefore, it is important for the counsellor to be aware of and sensitive to the individual's situation and needs. Abortion Care Guideline § 3.2.2.

**Additional notes**

Women who are pregnant for more than 12 weeks but less than 20 weeks have to go through a counselling to proceed with termination of pregnancy.

### Compulsory waiting period

**Not specified**

When there is no explicit reference to an issue covered in the questionnaire in the relevant document(s), this is noted and no interpretation was made.

**Related documents:**

Country recognized approval (mifepristone / mifeprisoprostol)

- Yes

Related documents:
- Clinical Practice Handbook for Safe Abortion Care, 2015 (page 78)
- Clinical Practice Handbook for Safe Abortion Care, 2015 (page 81)
- Clinical Practice Handbook for Safe Abortion Care, 2015 (page 49)
- Clinical Practice Handbook for Safe Abortion Care, 2015 (page 49)

WHO Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Vacuum aspiration is recommended for surgical abortions at or under 14 weeks to be provided by traditional and complementary medicine professionals, nurses, midwives, associate/advanced associate clinicians, generalist medical practitioners and specialist medical practitioners.

The Abortion Care Guideline recommends against the practice of dilatation and sharp curettage (D&C), including for sharp curette checks (i.e. to "complete" the abortion) following vacuum aspiration. Abortion Care Guideline § 3.4.1.

Dilation and evacuation (D&E) is recommended for surgical abortions at or over 14 weeks to be provided by generalist medical practitioners and specialist medical practitioners. Vacuum aspiration can be used during a D&E. Abortion Care Guideline § 3.4.1.

The recommended method for medical abortion is mifepristone followed by misoprostol (regimen differs by gestational age). Abortion Care Guideline § 3.4.2.

The Abortion Care Guideline recommends the use of misoprostol alone, with a regime that differs by gestational age. Evidence demonstrates that the use of combination mifepristone plus misoprostol is more effective than misoprostol alone. Abortion Care Guideline § 3.4.2.

Mifepristone and misoprostol should be listed in relevant national EMLs (NEMLs) or their equivalent and should be included in the relevant clinical care/service delivery guidelines.

Inclusion in the NEML is one important component of ensuring that quality medicines are available.

For induced abortion, Mifepristone (200 mg) and misoprostol (200 μg), are recommended in the WHO EML. The EML specifically mentions the following co-packaged formulation: 1 tablet mifepristone (200 mg) + 4 tablets misoprostol (200 μg).

Restrictions on prescribing authority for some categories of health workers may need to be modified or other mechanisms put in place to make the medicines available for these health workers within the regulatory framework of the health system. Abortion Care Guideline § 1.4.4.
WHO Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

Where can abortion services be provided

Related documents:
- WHO Abortion Care Guideline (page 48)

Primary health-care centres

Yes

The limit of 12 weeks gestational period applies to clinics outside hospitals. There is no gestational limit set for abortions done in hospitals. Therefore, the gestational limit is specific to the site where the abortion is conducted.

Termination of pregnancy pursuant to Criminal Code Articles 305(1) and (2) must be performed in the following medical premises:

1. A government hospital or government agency that provides overnight admission service to patients, or a medical infirmary that has beds for patients for overnight stay in accordance with the Medical Premise Act, these medical premises are allowed to perform appropriate therapeutic termination of pregnancy.

2. A medical clinic in accordance with the Medical Premise Act, is allowed to perform therapeutic termination of pregnancy where the gestational age is not over twelve weeks.

- Medical Council Regulations (page 2)

Secondary (district-level) health-care facilities

Yes

The limit of 12 weeks gestational period applies to clinics outside hospitals. There is no gestational limit set for abortions done in hospitals. Therefore, the gestational limit is specific to the site where the abortion is conducted.

### WHO Guidance

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

The Abortion Care Guideline recommends the option of telemedicine as an alternative to in-person interactions with the health worker to deliver medical abortion services in whole or in part. Telemedicine services should include referrals (based on the woman’s location) for medicines (abortion and pain control medicines), any abortion care or post-abortion follow-up required (including for emergency care if needed), and for post-abortion contraceptive services. Abortion Care Guideline § 3.6.1.

*Source document: WHO Abortion Care Guideline (page 133)*

---

**WHO Guidance**

The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts.

There is no single recommended approach to providing abortion services. The choice of specific health worker(s) (from among the recommended options) or management by the individual themself, and the location of service provision (from among recommended options) will depend on the values and preferences of the woman, girl or other pregnant person, available resources, and the national and local context. A plurality of service-delivery approaches can co-exist within any given context. Given that service-delivery approaches can be diverse, it is important to ensure that for the individual seeking care, the range of service-delivery options taken together will provide access to scientifically accurate, understandable information at all stages; access to quality-assured medicines (including those for pain management); back-up referral support if desired or needed; linkages to an appropriate choice of contraceptive services for those who want post-abortion contraception. Best Practice Statement 49 on service delivery. Abortion Care Guideline § 3.6.1.

<td><strong>WHO Guidance</strong></td>
<td></td>
<td>The following descriptions were extracted from WHO Abortion Care Guideline. Where there is a specific Recommendation, this is stated. Otherwise, these are excerpts. The Abortion Care Guideline recommends that access to and continuity of comprehensive abortion care be protected against barriers created by conscientious objection. It is critical that States ensure compliance with regulations and design/organize health systems to ensure access to and continuity of quality abortion care. If it proves impossible to regulate conscientious objection in a way that respects, protects and fulfills abortion seekers' rights, conscientious objection in abortion provision may become indefensible. Abortion Care Guideline § 3.3.9.</td>

Country specific information related to sexual and reproductive health indications. As data for the Sustainable Development Goal (SDG) indicators related to sexual and reproductive health become available, these will be provided, through periodic updates.

Goal 1. End poverty in all its forms everywhere

1.1.1 Proportion of population below the international poverty line, by sex, age, employment status and geographical location (urban/rural)

1.1.1 Proportion of population covered by social protection floors/systems, by sex, distinguishing children, unemployed persons, older persons, persons with disabilities, pregnant women, newborns, work-injury victims and the poor and the vulnerable

1.a.2 Proportion of total government spending on essential services (education, health and social protection)

Goal 3. Ensure healthy lives and promote well-being for all at all ages

3.1.1 Maternal mortality ratio

3.1.2 Proportion of births attended by skilled health personnel

3.7.1 Proportion of women of reproductive age (aged 15-49 years) who have their need for family planning satisfied with modern methods

3.7.2 Adolescent birth rate (aged 10-14 years; aged 15-19 years) per 1,000 women in that age group

3.8.2 Number of people covered by health insurance or a public health system per 1,000 population

3.c.1 Health worker density and distribution

Goal 4. Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

4.1.1 Proportion of children and young people: (a) in grades 2/3; (b) at the end of primary; and (c) at the end of lower secondary achieving at least a minimum proficiency level in (i) reading and (ii) mathematics, by sex

Goal 5. Achieve gender equality and empower all women and girls

5.1.1 Whether or not legal frameworks are in place to promote, enforce and monitor equality and nondiscrimination on the basis of sex

5.2.1 Proportion of ever-partnered women and girls aged 15 years and older subjected to physical, sexual or psychological violence by a current or former intimate partner in the previous 12 months, by form of violence and by age

5.2.2 Proportion of women and girls aged 15 years and older subjected to sexual violence by persons other than an intimate partner in the previous 12 months, by age and place of occurrence

5.3.1 Proportion of women aged 20-24 years who were married or in a union before age 15 and before age 18

5.3.2 Proportion of girls and women aged 15-49 years who have undergone female genital mutilation/cutting, by age

5.6.1 Proportion of women aged 15-49 years who make their own informed decisions regarding sexual relations, contraceptive use and reproductive health care

5.6.2 Number of countries with laws and regulations that guarantee women aged 15-49 years access to sexual and reproductive health care, information and education

5.a.1 (a) Proportion of total agricultural population with ownership or secure rights over agricultural land, by sex; and (b) share of women among owners or rights-bearers of agricultural land, by type of tenure

5.b.1 Proportion of individuals who own a mobile telephone, by sex

Goal 8. Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all
8.5.2 Unemployment rate, by sex, age and persons with disabilities

Goal 10. Reduce inequality within and among countries

10.2.1 Proportion of people living below 50 per cent of median income, by age, sex and persons with disabilities

10.3.1 Proportion of the population reporting having personally felt discriminated against or harassed within the previous 12 months on the basis of a ground of discrimination prohibited under international human rights law

Goal 16. Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels

16.1.3 Proportion of population subjected to physical, psychological or sexual violence in the previous 12 months

16.2.2 Number of victims of human trafficking per 100,000 population, by sex, age and form of exploitation

16.2.3 Proportion of young women and men aged 18-29 years who experienced sexual violence by age 18

16.3.1 Proportion of victims of violence in the previous 12 months who reported their victimization to competent authorities or other officially recognized conflict resolution mechanisms

16.5.1 Proportion of persons who had at least one contact with a public official and who paid a bribe to a public official, or were asked for a bribe by those public officials, during the previous 12 months

16.6.1 Primary government expenditures as a proportion of original approved budget, by sector (or by budget codes or similar)

16.6.2 Proportion of the population satisfied with their last experience of public services

16.7.1 Proportions of positions (by sex, age, persons with disabilities and population groups) in public institutions (national and local legislatures, public service, and judiciary) compared to national distributions

16.9.1 Proportion of children under 5 years of age whose births have been registered with a civil authority, by age

16.10.1 Number of verified cases of killing, kidnapping, enforced disappearance, arbitrary detention and torture of journalists, associated media personnel, trade unionists and human rights advocates in the previous 12 months

Goal 17. Strengthen the means of implementation and revitalize the Global Partnership for Sustainable Development

17.8.1 Proportion of individuals using the Internet

Additional Reproductive Health Indicators

Percentage of married women with unmet need for family planning 6.2 (2016)

Percentage of births attended by trained health professional 99.1 (2016)

Percentage of women aged 20-24 who gave birth before age 18 13 (2009-2013)

Total fertility rate 1.525 (2018)

Legal marital age for women, with parental consent 17 (2009-2017)
